

Individuals that choose to participate will take part in the assessment over a 4-week period, at locations of their choice where an Internet connection is available. The assessment will require a total of two and a half (2.5) hours of the respondent's time, thus presenting a minimal burden to each respondent.

Participants will be asked to read and sign an electronic consent form granting their consent to participate in the assessment. Participants will then complete an online Entrance Form, which addresses their familiarity with computers, computer use in employment and leisure, common Web sites they visit and/or use, and expectations of the Tech Clearinghouse. They will then utilize and assess the Tech Clearinghouse by conducting specified and general searches and providing feedback through online assessment instruments (Structured Assessment Cases). After completing the Structured Assessment Cases, participants will complete an online Exit Form, which addresses the participant's satisfaction with and the overall usability of the Tech Clearinghouse and specific functions included in the Tech Clearinghouse. The electronic data collection forms will standardize the collection of information that is both necessary and sufficient for assessing the Tech Clearinghouse. All online assessment instruments were created using *mrInterview™ 4.0* software, which works in conjunction with the Statistical Package for the Social Sciences (SPSS™). Data collected from online assessment instruments will be analyzed using SPSS™ 15.0.

Data will be stored in password-protected computers accessible only to authorized personnel, and no data will be associated in any way with personally identifiable information (PII).
