SUPPLEMENTARY INFORMATION:

I. Summary of Information About the Integrated Risk Information System (IRIS)

IRIS is a database that contains potential adverse human health effects information that may result from chronic (or lifetime) exposure to specific chemical substances found in the environment. The database (available on the Internet at <http://www.epa.gov/iris>) contains qualitative and quantitative health effects information for more than 540 chemical substances that may be used to support the first two steps (hazard identification and dose-response evaluation) of a risk assessment process. When supported by available data, the database provides oral reference doses (RfDs) and inhalation reference concentrations (RfCs) for chronic health effects, and oral slope factors and inhalation unit risks for carcinogenic effects. Combined with specific exposure information,

government and private entities can use IRIS data to help characterize public health risks of chemical substances in a site-specific situation and thereby support risk management decisions designed to protect public health.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Agency is announcing the availability of a Pesticide Registration Notice (PR Notice) entitled

“Environmental Hazard General Labeling Statements on Outdoor Residential Use Products.” This PR Notice was issued by the Agency on May 9, 2008 and is identified as PR Notice 2008–1. PR Notices are issued by the Office of Pesticide Programs (OPP) to inform pesticide registrants and other interested persons about important policies, procedures, and registration related decisions, and serve to provide guidance to pesticide registrants and OPP personnel. This particular PR Notice provides guidance to the registrant concerning new environmental hazard statements that are designed to replace language created for agricultural products with statements that are easier for consumers to understand. The new environmental hazard statements are divided by product type (e.g., liquid ready-to-use, broadcast granular), and recommends specific language for each product type to minimize risks to the human health and the environment, with emphasis on reducing risks to water. Revisions to product labels using these new statements may be made by notification.

Proposed Approval of the Central Characterization Project’s Remote-Handled Waste Characterization Program at Savannah River Site

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability; opening of public comment period.

SUMMARY: The Environmental Protection Agency (EPA or we) is announcing the availability of, and soliciting public comments for 45 days on, the proposed approval of the radioactive, remote-handled (RH), transuranic (TRU) waste characterization program implemented by the Central Characterization Project (CCP) at Savannah River Site (SRS). This waste, which originated from the Battelle Columbus Laboratory (BCL), is intended for disposal at the Waste Isolation Pilot Plant (WIPP) in New Mexico.

In accordance with the WIPP Compliance Criteria, EPA evaluated the characterization of RH TRU debris waste from SRS–CCP during a baseline inspection (and follow-up inspections) conducted the weeks of July 17–19, 2007, July 31–August 2, 2007, and December 4–5, 2007. Using the systems and processes developed as part of the U.S. Department of Energy’s (DOE’s) Carlsbad Field Office (CBFO) program to characterize RH TRU waste, EPA verified whether DOE could adequately characterize RH TRU waste consistent with the Compliance Criteria. The results of EPA’s evaluation of the SRS–CCP program and its proposed approval are described in the Agency’s inspection report, which is available for review in the public dockets listed in **ADDRESSES**. We will consider public comments received on or before the due date mentioned in **DATES**.

This notice summarizes the waste characterization processes evaluated by EPA and EPA’s proposed approval. As required by the 40 CFR 194.8, at the end of a 45-day comment period EPA will evaluate public comments received, and if appropriate, finalize the reports responding to the relevant public comments, and a final report and approval letter to DOE.

DATES: Comments must be received on or before July 7, 2008.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2008–0410, by one of the following methods:
