

On April 11, 2008, notice was published that the Commonwealth of Massachusetts had petitioned the Regional Administrator, Environmental Protection Agency, to determine that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for the state waters of Scituate, Marshfield, Cohasset, and the tidal portions of the North and South Rivers. No comments were received on this petition.

The petition was filed pursuant to Section 312(f)(3) of Public Law 92-500, as amended by Public Laws 95-217 and 100-4, for the purpose of declaring these waters a "No Discharge Area" (NDA).

Section 312(f)(3) states: After the effective date of the initial standards and regulations promulgated under this section, if any State determines that the protection and enhancement of the quality of some or all of the waters within such States require greater environmental protection, such State may completely prohibit the discharge from all vessels of any sewage, whether treated or not, into such waters, except that no such prohibition shall apply until the Administrator determines that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for such water to which such prohibition would apply.

The information submitted to EPA by the Commonwealth of Massachusetts

certifies that there are ten pumpout facilities located within the proposed area. A list of the facilities, with phone numbers, locations, and hours of operation is appended at the end of this determination.

Based on the examination of the petition, its supporting documentation, and information from site visits conducted by EPA New England staff, EPA has determined that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for the area covered under this determination.

This determination is made pursuant to Section 312(f)(3) of Public Law 92-500, as amended by Public Laws 95-217 and 100-4.

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OAR-2008-0380; FRL-8569-5]

Notice of Receipt of a Request From the State of Texas for a Waiver of a Portion of the Renewable Fuel Standard

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In accordance with section 211(o)(7) of the Clean Air Act (the Act), 42 U.S.C. 7545(o)(7), EPA is issuing a

notice of receipt of a request for a waiver of 50 percent of the renewable fuel standard (RFS) "mandate for the production of ethanol derived from grain." The request has been made by the Governor of the State of Texas. Section 211(o)(7)(A) of the Act allows the Administrator of the EPA to grant the waiver if implementation of the national RFS requirements would severely harm the economy or environment of a state, a region, or the United States, or if EPA determines that there is inadequate domestic supply of renewable fuel. EPA is required by the Act to provide public notice and

opportunity for comment on this request.

DATES: *Comments.* Written comments must be received on or before June 23, 2008.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-HQ-OAR-2008-0380, by one of the following methods:

Once in the system, select "search," then key in the docket ID number identified in this document.

(B) What Information Is EPA Particularly Interested In?

On April 25, 2008, the Governor of Texas submitted a request to the Administrator under section 211(o) of the Act for a waiver of 50 percent of the RFS "mandate for the production of ethanol derived from grain." The request includes statements regarding the economic impact of higher corn prices in Texas. This request has been placed in the public docket.

Pursuant to section 211(o)(7) of the Act, EPA specifically solicits comments and information to enable the Administrator to determine if the statutory basis for a waiver of the national RFS requirements has been met and, if so, the extent to which EPA should exercise its discretion to grant a waiver. Section 211(o)(7) of the Act allows the Administrator, in consultation with the Secretary of Agriculture and the Secretary of Energy, to waive the requirements of the

national RFS at 40 CFR 80.1105, in whole or in part, upon petition by one or more States. A waiver may be granted if the Administrator determines, after public notice and an opportunity for public comment, that implementation of the RFS requirements would severely harm the economy or environment of a state, a region, or the United States; or that there is an inadequate domestic supply of renewable fuel. The Administrator, in consultation with the Secretary of Agriculture and the Secretary of Energy, shall approve or disapprove a State petition for a waiver within 90 days of receiving it. If a waiver is granted, it can last no longer than one year unless it is renewed by the Administrator after consultation with the Secretary of Agriculture and the Secretary of Energy. The RFS for 2008 was published in the **Federal Register** on February 14, 2008 (73 FR 8665) and was intended to lead to the use of nine (9) billion gallons of renewable fuel in 2008.

EPA requests comment on any matter that might be relevant to EPA's action on the petition, specifically including (but not limited to) information that will enable EPA to:

(a) Evaluate whether compliance with the RFS is causing severe harm to the economy of the State of Texas;

(b) evaluate whether the relief requested will remedy the harm;

(c) determine to what extent, if any, a waiver approval would change demand for ethanol and affect corn or feed prices; and

(d) determine the date on which a waiver should commence and end if it were granted.

In addition to inviting comments on the above issues, EPA recognizes that it has discretion in deciding whether to grant a waiver, as the statute provides that "[t]he Administrator * * * may waive the requirements of [section 211(o)(2)] in whole or in part" (emphasis supplied) if EPA determines that the severe harm criteria has been met. EPA also recognizes that a waiver would involve reducing the national volume requirements under section 211(o)(2), which would have effects in areas of the country other than Texas, including areas that may be positively impacted by the RFS requirements. Given this, EPA invites comment on all issues relevant to deciding whether and how to exercise its discretion under this provision, including but not limited to the impact of a waiver on other regions or parts of the economy, on the environment, on the goals of the renewable fuel program, on appropriate mechanisms to implement a waiver if a waiver were determined to be

appropriate, and any other matters considered relevant to EPA's exercise of discretion under this provision.

Commenters should include data or specific examples in support of their comments in order to aid the Administrator in determining whether to grant or deny the waiver. Data that shows a quantitative link between the use of corn for ethanol and corn prices, and on the impact of the RFS mandate on the amount of ethanol produced, would be especially helpful.

Dated: May 16, 2008.

Robert J. Meyers,

*Principal Deputy Assistant Administrator,
Office of Air and Radiation.*
