POLICY JUSTIFICATION**Australia – Large Aircraft Infrared Countermeasures (LAIRCM) Systems**

The Government of Australia has requested a possible sale of AN/AAQ-24(V) LAIRCM systems to be installed on C-130J aircraft, including the following Line Replaceable Units (LRUs): 12 Control Interface Units (CIU), 12 System Processors (SP), 12 AN/AAR-54(V) Missile Warning Systems (MWS), 12 Small Laser Transmitter Assemblies (SLTA), Operational Flight Program (OFP) software, and spare LRUs (6 Control Interface Units (CIU), 6 System Processors (SP), 7 individual MWS sensors, and 12 Small Laser Transmitter Assemblies (SLTA)). Also included: installation support, engineering change proposals, minor modifications, support equipment, spare and repair parts, publications and technical documents, repair and return, depot maintenance, training and training equipment, U.S. Government and contractor technical assistance, and other related elements of logistics and program support. The estimated cost is \$100 million.

Australia is an important ally in the Western Pacific. The strategic location of this political and economic power contributes significantly to ensuring peace and economic stability in the region. Australia's efforts in peacekeeping and humanitarian operations have made a significant impact to regional political and economic stability and have served U.S. national security interests. This proposed sale is consistent with those objectives and facilitates burden sharing with our allies.

These systems will be integrated on Australia's C-130J aircraft. The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Northrop Grumman Corporation, Rolling Meadows, IL. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this sale will require approximately five contractor representatives to provide training, installation, and maintenance support technical and logistics support in Australia for twelve weeks after delivery. U.S. Government and contractor representatives will also participate in program management and technical reviews for two-week intervals annually.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 08-61**Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act****Annex
Item No. vii****(vii) Sensitivity of Technology:**

1. The AN/AAQ-24(V) LAIRCM is a self-contained, directed energy countermeasures system designed to protect aircraft from infrared-guided surface-to-air missiles. The system features digital technology and micro-miniature solid-state electronics. The system operates in all conditions, detecting incoming missiles and jamming infrared-seeker equipped missiles with aimed bursts of laser energy. Major components and subsystems of the LAIRCM system are unclassified; technical data documentation, training, devices and services to be conveyed with the proposed sale are also unclassified.

2. LAIRCM system software, including Operational Flight Program and jam codes, are classified Secret. LAIRCM operational parameters, test report data, and specific capabilities and limitations are classified Secret and will not be conveyed with the proposed sale. This information is sensitive due to potential for system exploitation and development of effective counter-countermeasures or similar defensive systems.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware or software in this proposed sale, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advance capabilities.
