SUPPLEMENTARY INFORMATION:

**Proposed Action Background**

The FHWA and WSDOT will prepare an EIS on the proposed widening of the SR 502 Corridor (NE 219th Street) in north Clark County from a two-lane roadway to a four-lane roadway with a median barrier separating westbound and eastbound travel. The SR 502 Corridor Widening is proposed between NE 15th Avenue and NE 102nd Avenue, for a length of approximately 5 miles. The project also proposes to construct paved shoulders for pedestrian and bicycle use, stormwater facilities, and three new signalized intersections on SR 502 at NE 29th Avenue, NE 50th Avenue, and NE 92 Avenue in addition to the existing signalized intersection on SR 502 at NE 72nd Avenue (Dollars Corner). These improvements are proposed to address the current and future deficiencies related to mobility and safety within the SR 502 corridor.

The SR 502 Corridor Widening Project began as an Environmental Assessment (EA) in early 2007. One agency scoping meeting and one public scoping meeting were held on February 22, 2007, to identify issues and concerns as well as provide input into establishing a range of alternatives for the project. A wide range of alternatives were considered between February and September 2007. Six “on-corridor” alternatives, including widening the existing facility directly to either the north or south of the existing facility, or equally on both sides from the centerline, were studied. Additionally, two “off-corridor” alternatives, which considered constructing a new roadway for SR 502 further north or south of the existing corridor, were studied. Four public open house meetings were held to gather public input on the range of alternatives being considered for the project on: March 27, 2007; May 9, 2007; June 14, 2007; and September 27, 2007. These public meetings resulted in strong public support for one “on corridor” alternative, which was forwarded for further detailed environmental study along with the no action alternative. As draft environmental discipline studies of the possible effects of the potential alternatives were conducted, it was determined that the widening of the SR 502 corridor may substantially affect the quality of the human and natural environment and may benefit from a more detailed analysis. Therefore, the FHWA and WSDOT elected to prepare an ETS.

**Alternatives**

The EIS will address, at a minimum, the no action alternative and the following action alternative:  

**On-corridor Widening Alternative:** This alternative would widen the existing SR 502 facility to four general purpose travel lanes from just west of NE 15th Avenue to NE 102nd Avenue. Along the entire SR 502 corridor, two lanes would be constructed in each direction with a median barrier separating westbound and eastbound travel between the four signalized intersections at NE 29th Avenue, NE 50th Avenue, NE 72nd Avenue (Dollars Corner), and NE 92nd Avenue. Paved shoulders that could be used by pedestrians and bicyclists would also be constructed the length of the corridor. Curb and sidewalk would accommodate additional pedestrian travel through the Dollars Corner rural commercial center between roughly NE 67th Avenue and the NE 7600 block of SR 502. Except at the four signalized intersections, turns from SR 502 would be restricted to right-in/right-out turning movements. Stormwater treatment facilities would
