Title: National-Scale Activity Survey (N-SAS).

ICR numbers: EPA ICR No. 2293.01, OMB Control No. 2060-NEW.

ICR Status: This ICR is for a new information collection activity. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: EPA supports the Air Quality Index (AQI), a program that uses data from air quality monitors to forecast pollution levels and to notify the public of health hazards associated with air pollution, primarily ozone and particulate matter pollution (PM). EPA, specifically the Office of Air Quality Planning and Standards, which manages the AQI program, is interested in assessing the public's awareness, knowledge and both stated and actual behavioral response to AQI warnings. To address this need, OAQPS wishes to conduct the National-Scale Activity Surveys (N-SAS) to gather information on perceptions, awareness, attitudes, and stated and actual behaviors in response to AQI warnings.

EPA is requesting permission from OMB to conduct a survey of 1,600 individuals age 35 or older who meet minimal activity requirements living in Washington, DC; Sacramento (also other cities in San Joaquin Valley—San Joaquin, Stanislaus, Merced, Madera, Fresno), Chicago, Dallas, Houston, Atlanta, Philadelphia, or St. Louis. The data will be collected through a web-based survey of members from Knowledge Network's web panel.

The N-SAS consists of a series of nine surveys. A screening survey at the beginning and a debriefing survey at the end will provide information on the research participants, their awareness and knowledge of air pollution and the Air Quality Index (AQI), risk perceptions regarding health effects, and reported behaviors on high ozone days. After the screening survey, research participants will be administered a set of seven activity diaries administered on both high and low ozone days to collect information on actual behavior.

The information obtained from N-SAS will be used by EPA to assess hypotheses for the N-SAS research participants regarding:

- Extent of awareness of and knowledge about the AQI;
- The effects of the AQI-based warnings on behavior in eight cities with significant pollution problems;
- The correlation between awareness, knowledge, stated behavior on high pollution days and data on behavior reported in the activity diaries!
- Differences in behavior, awareness and knowledge among different sub-samples of the N-SAS research participants.

In addition to assessing the effectiveness of AQI-based ozone warnings, the data will also be used to supplement the limited data available to develop exposure profiles for older Americans.

Participation in N-SAS and response to individual questions are voluntary. The respondents will be anonymous to EPA and contractor staff and Knowledge Networks keeps identify of respondents confidential.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 0.25 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Members of the Knowledge Networks web panel (1) age 35 or older, (2) who respond yes to "During the past month, did you participate in any physical activities or exercises such as running, calisthenics, golf, gardening, or walking for exercise?" and (3) live in Washington, DC; Sacramento (also other cities in San Joaquin Valley—San Joaquin, Stanislaus, Merced, Madera, Fresno), Chicago, Dallas, Houston, Atlanta, Philadelphia, or St. Louis.

Estimated Number of Respondents: 1,600.

Frequency of Response: Up to 10 responses per respondent over 4 months.

Estimated Total Annual Hour Burden: 828 hours.

Estimated Total Annual Cost: \$22,803, includes \$0 annualized capital or O&M costs.

Dated: June 2, 2008.

Director, Collection Strategies Division.
