

management; maintain an on-going public involvement program regarding the noise compatibility program; maintain the noise and flight track monitoring system and expand and upgrade the system as necessary and add four permanent noise monitoring towers and upgrade the computer software and hardware as necessary; routinely update the noise contours and periodically update the noise program; and establish a land use compatibility task force which meets periodically to discuss issues relevant to airport noise compatibility planning. Approval as a voluntary measure was granted for two (2) program elements. These elements were: Increase nighttime use of Runway 10L/28R and amend FAA Tower Order CMH ATCT 7110.1 to read as follows: "Unless wind, weather, runway closure, or loss of NAVAIDs dictate otherwise, between the hours of 10 p.m. and 8 a.m. local time, runways 28L and 10R are assigned jet aircraft; jet aircraft with Stage 3 engines may use Runway 10L/28R for arrival operations between the hours of 10 p.m. and 1 a.m. local time; and jet aircraft with Stage 3 engines may use Runway 10L and 28R after 6 a.m."; and maximize east flow and amend FAA Tower Order CMH ATCT 7110.1b and the Airport Facilities Directory to reflect implementation of the "east flow" informal preferential runway use system. No action was taken on two (2) program elements. These elements were: Construct a new run-up barrier at the north airfield, if the EJA (NetJets) building does not adequately attenuate jet maintenance run-up noise for adjacent residential areas located along 1-270; and offer a program for noise insulation for noncompatible structures for noncompatible churches within the 65+ DNL contour for the 2012 NEMINCP condition in exchange for an aviation easement. No action was required as the measure relates to flight procedures under 49 U.S.C. 47504 was taken on two (2) program elements. These program elements were: Implement a 15-degree turn off of Runway 28R, after crossing the runway end to a 295-degree heading, only during peak operating periods when traffic warrants; and create performance-based overlay procedures for all existing and proposed arrival/departure procedures (RNAV/RNP/GPS/CDA).

These determinations are set forth in detail in a ROA signed by the Great Lakes Region Airports Division Manager on May 19, 2008. The ROA, as well as other evaluation materials and the documents comprising the submittal, are available for review at the FAA office listed above. The ROA also will

be available online at http://www.faa.gov/airports_airtraffic/airports/environmental/airport_noise.
