DEPARTMENT OF ENERGY

[Docket No. PP-299]

Record of Decision Port Angeles-Juan de Fuca Transmission Project

AGENCY: Bonneville Power Administration and the Office of Electricity Delivery and Energy Reliability, U.S. Department of Energy.

ACTION: Record of Decision (ROD).

SUMMARY: The Department of Energy (DOE) announces its decision to implement its Proposed Action and Preferred Alternative as identified in the Port Angeles-Juan de Fuca Transmission Project Final Environmental Impact Statement (DOE/EIS-0378, October 2007). Sea Breeze Olympic Converter LP (Sea Breeze) applied to DOE for authorizations and approvals necessary to construct the United States (U.S.) portion of an international electric power transmission cable from the greater Victoria area, British Columbia, Canada, across the Strait of Juan de Fuca to Port Angeles, Washington, United States. Under the Proposed Action, the Bonneville Power Administration (BPA), an organizational element within DOE, will offer contract terms to Sea Breeze for interconnection of the cable with the Federal Columbia River Transmission System, which is owned and operated by BPA. Additionally, the Office of Electricity Delivery and Energy Reliability (OE), another organizational element within DOE, will issue a Presidential permit to Sea Breeze to construct, operate, maintain, and connect the $\pm 150,000$ -volt (150-kV) direct current (DC) submarine cable that crosses the U.S.-Canadian border.

BPA's Proposed Action includes the expansion of BPA's Port Angeles Substation to accommodate the interconnection. The interconnection will allow power flow over BPA's transmission system to the extent that capacity on the system is available. The Proposed Action does not include transmission service over BPA's system, which must be requested separately. The Proposed Action included two short routing options (A and B) for the transmission cable as it enters BPA's substation property; BPA has chosen the Option A route.

In reaching this decision, DOE considered the low potential for environmental impacts in the United States from constructing, operating, maintaining, and connecting the project, the lack of adverse impacts to the reliability of the U.S. electric power supply system, and the lack of major issues of concern to the public.

ADDRESSES: This ROD will be sent to interested parties and affected persons and agencies who requested a copy. Project documents, including the Draft and Final EIS, are available on the DOE National Environmental Policy Act (NEPA) Web site at <http://www.eh.doe.gov/nepa/eis/eis0378/index.html> and on the BPA project Web site at http://www.efw.bpa.gov/environmental_services/Document_Library/PortAngeles/. The Supplement Analysis, Record of Decision, and Mitigation Action Plan will soon be available on these sites. These documents may be obtained from BPA's Public Information Center, P.O. Box 3621, Portland, Oregon, 97208-3621; or by using BPA's nationwide toll-free document request line at 800-622-4520. The documents may also be obtained by contacting Dr. Jerry Pell at the Office of Electricity Delivery and Energy Reliability, U.S. Department of Energy, OE-20, 1000 Independence Avenue, SW., Washington, DC 20585; by telephone at 202-586-3362; by facsimile at 202-318-7761; or by electronic mail at Jerry.Pell@hq.doe.gov.

SUPPLEMENTARY INFORMATION:

Background

BPA is an organizational unit within DOE that owns and operates most of the high-voltage electric transmission system in the Pacific Northwest. BPA has adopted an Open Access Transmission Tariff that is consistent with the Federal Energy Regulatory Commission's (FERC) *pro forma* open access tariff.¹ Under BPA's tariff, BPA

¹ Although BPA is not subject to the FERC's jurisdiction, BPA follows the open access tariff as a matter of national policy. This course of action demonstrates BPA's commitment to non-discriminatory access to its transmission system and ensures that BPA will receive non-discriminatory access to the transmission systems of utilities that are subject to FERC's jurisdiction.
