SUPPLEMENTARY INFORMATION:

Throughout this document, whenever “we,” “us,” or “our” is used, we mean EPA.

Today’s notice is simply an announcement of a finding that we have already made. EPA Region IX sent a letter to the Arizona Department of Environmental Quality and the Maricopa Association of Governments on May 30, 2008 stating that the 2010 motor vehicle emissions budget for PM-10 in the submitted 2007 MAG 5% Plan is adequate. The budget corresponds to the Phoenix metropolitan PM-10 nonattainment area, which encompasses roughly half of Maricopa County, including the cities of Phoenix and Mesa, and also the Apache Junction area of Pinal County, in central Arizona. Receipt of this motor vehicle emissions budget was announced on EPA’s transportation conformity Web site, and no comments were submitted. The finding is available at EPA’s conformity Web site: <http://www.epa.gov/otaq/stateresources/transconf/adequacy.htm>.

The adequate 2010 motor vehicle emissions budget (calculated for an annual average day) are provided in the following table:

ADEQUATE MOTOR VEHICLE EMISSIONS BUDGET
[In metric tons per day]

Budget year	PM-10 motor vehicle emissions budget
2010	103.3

Transportation conformity is required by Clean Air Act section 176(c). EPA’s conformity rule requires that transportation plans, transportation improvement programs, and projects conform to state air quality implementation plans (SIPs) and establishes the criteria and procedures for determining whether or not they do conform. Conformity to a SIP means that transportation activities will not produce new air quality violations, worsen existing violations, or delay timely attainment of the national ambient air quality standards.

The criteria by which we determine whether a SIP’s motor vehicle emissions budgets are adequate for conformity purposes are outlined in 40 CFR 93.118(e)(4). We have described our process for determining the adequacy of submitted SIP budgets in our July 1, 2004, preamble starting at 69 FR 40038, and we used the information in these

resources while making our adequacy determination. Please note that an adequacy review is separate from EPA’s completeness review, and should not be used to prejudge EPA’s ultimate approval action for the SIP. Even if we find a budget adequate, the SIP could later be disapproved.

Notice of Availability for the Framework for Application of the Toxicity Equivalence Methodology for Polychlorinated Dioxins, Furans, and Biphenyls in Ecological Risk Assessment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of document availability.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is announcing the availability of the final "Framework for Application of the Toxicity Equivalence Methodology for Polychlorinated Dioxins, Furans, and Biphenyls in Ecological Risk Assessment" (EPA/100/R-08/004). The purpose of the Framework is to assist EPA scientists in using the toxicity equivalence methodology to assess ecological risks from mixtures of dioxin-like chemicals, i.e., polychlorinated dibenzo-p-dioxins (PCDDs), dibenzofurans (PCDFs), and biphenyls (PCBs), as well as to inform EPA decision makers, other agencies, and the public about this methodology. This framework provides an introduction to the toxicity equivalence methodology, offers considerations for how and when to apply the methodology, and presents practical examples of its use. The Framework thus serves to enhance the application of the best available science. This document is not intended to serve as guidance on how to conduct a comprehensive risk assessment for dioxin-like chemicals or to act as a regulation or binding policy. EPA's Risk Assessment Forum oversaw the development of this document, incorporating input obtained from an expert workshop, scientists throughout the Agency, stakeholders, and a peer review by twelve experts from a range of scientific disciplines.

ADDRESSES: The final document is available electronically through the EPA Office of the Science Advisor's Web site at: <http://www.epa.gov/osa/raf/>

tefframework/. A limited number of paper copies will be available from EPA's National Service Center for Environmental Publications (NSCEP), P.O. Box 42419, Cincinnati, OH 45242; telephone 1-800-490-9198 or 513-489-8190; facsimile 301-604-3408; e-mail NSCEP@bps-imit.com. Please provide your name and mailing addresses and the title and EPA number (as given above) of the requested publication.

SUPPLEMENTARY INFORMATION: For more than a decade, EPA and other organizations have estimated the combined risks that mixtures of PCDDs, PCDFs, and PCBs pose to human health using the toxicity equivalence methodology. As both data and experience with the methodology have accumulated, experts have come to the consensus that the toxicity equivalence methodology can strengthen assessments of ecological risks as well. In 1998, EPA and DOI sponsored a workshop that recommended the development of further guidance on application of the toxicity equivalence methodology in ecological risk assessment. This framework has been developed in direct response to that workshop recommendation. EPA consulted with other federal agencies at key points during the document's development. In July 2003, EPA released a draft Framework for a 60-day public comment period. An external peer review was conducted in 2004 by twelve experts from a range of scientific disciplines.
