

building containing both NARA and Foundation-controlled areas will be determined using the following formula: The percentage of the usable square footage of the NARA-controlled areas to the usable square footage of the entire building multiplied by the cost of the entire building. That figure is then used in calculating a library's endowment as specified by subsection (d) of this section and 44 U.S.C. 2112(g)(3)–(5).

§ 1281.16 What standard does NARA use for measuring building size?

For purposes of 44 U.S.C. 2112(g)(3) and (4), and this part, NARA has adopted the BOMA Standard (incorporated by reference in § 1281.2) as the standard for measuring the size of the facility and the value for calculating the endowment. The architectural and design standards contain the description of the area to be measured as to obtain the useable square footage and the exclusions to the measurement.
