Proposed Approval of the Central Characterization Project's Transuranic Waste Characterization Program at Oak Ridge National Laboratory

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability; opening of public comment period.

SUMMARY: The Environmental Protection Agency (EPA or we) is announcing the availability of, and soliciting public comments for 45 days on, the proposed approval of the radioactive, contact-handled (CH), transuranic (TRU) waste characterization program implemented by the Central Characterization Project (CCP) at Oak Ridge National Laboratory (ORNL) in Oak Ridge, Tennessee. This waste is intended for disposal at the Waste Isolation Pilot Plant (WIPP) in New Mexico.

In accordance with the WIPP Compliance Criteria, EPA evaluated the characterization of CH TRU debris waste from ORNL-CCP during an inspection conducted the week of November 13, 2007. Using the systems and processes developed as part of the U.S. Department of Energy's (DOE's) Carlsbad Field Office (CBFO) program, EPA verified whether DOE could adequately characterize CH TRU waste consistent with the Compliance Criteria. The results of EPA's evaluation of ORNL-CCP's program and its proposed approval are described in the Agency's inspection report, which is available for review in the public dockets listed in **ADDRESSES**. We will consider public comments received on or before the due date mentioned in **DATES**.

This notice summarizes the waste characterization processes evaluated by EPA and EPA's proposed approval. As required by the 40 CFR 194.8, at the end of a 45-day comment period EPA will evaluate public comments received, and if appropriate, finalize the reports responding to the relevant public comments, and issue a final report and approval letter to DOE.

DATES: Comments must be received on or before August 4, 2008.
