BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and

that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The NRC published a **Federal Register** Notice with a 60-day comment period on this information collection on March 28, 2008.

1. *Type of submission, new, revision, or extension:* Extension.

2. *The title of the information collection:* 10 CFR Part 72, Licensing Requirements for the Independent Storage of Spent Nuclear Fuel and High-Level Radioactive Waste.

3. *Current OMB approval number:* 3150–0132.

4. *The form number if applicable:* Not applicable.

5. *How often the collection is required:* Required reports are collected and evaluated on a continuing basis as events occur; submittal of reports varies from less than one per year under some rule sections to up to an average of about 100 per year under other rule sections. Applications for new licenses, certificates of compliance (CoCs), and amendments may be submitted at anytime; applications for renewal of licenses are required every 20 years for an Independent Spent Fuel Storage Installation (ISFSI) or Certificate of Compliance (CoC) and every 40 years for a Monitored Retrievable Storage (MRS) facility.

6. *Who will be required or asked to report:* Certificate holders of casks for the storage of spent fuel; licensees and applicants for a CoC or a license to possess power reactor spent fuel and other radioactive materials associated with spent fuel storage in an ISFSI; and the Department of Energy for licenses to receive, transfer, package and possess power reactor spent fuel, high-level waste, and other radioactive materials associated with spent fuel and high-level waste storage in an MRS.

7. *An estimate of the number of annual responses:* 370 (320 responses + 50 recordkeepers).

8. *The estimated number of annual respondents:* 50.

9. *An estimate of the total number of hours needed annually to complete the requirement or request:* 25,551 (22,781 hours for reporting [71 hours per response] and 2,770 hours for recordkeeping [55 hours per recordkeeper]).

10. *Abstract:* 10 CFR Part 72 establishes mandatory requirements, procedures, and criteria for the issuance of licenses to receive, transfer, and possess power reactor spent fuel and other radioactive materials associated with spent fuel storage in an ISFSI, as well as requirements for the issuance of licenses to the Department of Energy to

receive, transfer, package, and possess power reactor spent fuel and high-level radioactive waste, and other associated radioactive materials in an MRS. The information in the applications, reports, and records is used by NRC to make licensing and other regulatory determinations.

A copy of the final supporting statement may be viewed free of charge at the NRC Public Document Room, One White Flint North, 11555 Rockville Pike, Room O–1 F21, Rockville, MD 20852. OMB clearance requests are available at the NRC worldwide Web site: <http://www.nrc.gov/public-involve/doc-comment/omb/index.html>. The document will be available on the NRC home page site for 60 days after the signature date of this notice.

Comments and questions should be directed to the OMB reviewer listed below by July 23, 2008. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given to comments received after this date.

Nathan J. Frey, Office of Information and Regulatory Affairs (3150–0132), NEOB–10202, Office of Management and Budget, Washington, DC 20503.

Comments can also be e-mailed to Nathan.J.Frey@omb.eop.gov or submitted by telephone at (202) 395–7345.

The NRC Clearance Officer is Margaret A. Janney, (301) 415–7245.

Dated at Rockville, Maryland, this 17th day of June, 2008.

For the Nuclear Regulatory Commission.

Gregory Trussell,

Acting NRC Clearance Officer, Office of Information Services.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an

agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The NRC published a **Federal Register** Notice with a 60-day comment period on this information collection on April 1, 2008.

1. *Type of submission, new, revision, or extension:* Extension.

2. *The title of the information collection:* NRC Form 536, "Operator Licensing Examination Data."

3. *Current OMB approval number:* 3150-0131.

4. *The form number if applicable:* NRC Form 536.

5. *How often the collection is required:* Annually.

6. *Who will be required or asked to report:* All holders of and applicants for operating licenses for commercial nuclear power reactors.

7. *An estimate of the number of annual responses:* 80.

8. *The estimated number of annual respondents:* 80.

9. *An estimate of the total number of hours needed annually to complete the requirement or request:* 80.

10. *Abstract:* NRC is requesting renewal of its clearance to annually request all commercial power reactor licensees and applicants for an operating license to voluntarily send to the NRC: (1) Their projected number of candidates for initial operator licensing examinations; (2) the estimated dates of the examinations; (3) if the examinations will be facility developed or NRC developed, and (4) the estimated number of individuals that will participate in the Generic Fundamentals Examination (GFE) for that calendar year. Except for the GFE, this information is used to plan budgets and resources in regard to operator examination scheduling in order to meet the needs of the nuclear power industry.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-445 AND 50-446]

Luminant Generation Company, LLC; Comanche Peak Steam Electric Station, Units 1 and 2; Final Environmental Assessment and Finding of No Significant Impact Related To the Proposed License Amendment To Increase the Maximum Reactor Power Level

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

SUMMARY: As required by Title 10 of the *Code of Federal Regulations* 10 CFR part 51, the NRC has prepared a final Environmental Assessment (EA) associated with its evaluation of a request by the TXU Generation Company, LP (subsequently renamed Luminant Generation Company, LLC, the licensee), for a license amendment to increase the maximum thermal power at the Comanche Peak Steam Electric Station (CPSES), Units 1 and 2, from 3458 megawatts thermal (MWt) to 3612 MWt at each unit. The NRC staff did not identify any significant impact from the information provided in the licensee's stretch power uprate (SPU) application for CPSES, Units 1 and 2 or from the NRC staff's independent review. The final EA and Finding of No Significant Impact are being published in the **Federal Register**.

The NRC published a draft EA and finding of no significant impact on the proposed action for public comment in the **Federal Register** on April 30, 2008 (73 FR 23503). No comments were received.

Environmental Assessment

The NRC is considering issuance of an amendment to Facility Operating License Nos. NPF-87 and NPF-89,

issued to Luminant Generation Company, LLC, for operation of the CPSES, Units 1 and 2, located in Somervell County, Texas. Therefore, consistent with Section 51.21 of Title 10 of the *Code of Federal Regulations* (10 CFR), the NRC is issuing this final EA and finding of no significant impact.

Identification of the Proposed Action

The proposed action would revise the CPSES, Units 1 and 2 operating licenses and technical specifications (TSs) to increase the licensed rated power by 4.5 percent from 3458 MWt to 3612 MWt. The proposed action is in accordance with the licensee's application dated August 28, 2007, as supplemented by letters dated October 24, November 7, and December 3, 2007, January 10, 29, and 31, February 21, 26, and 28, March 6, April 17, and May 14, 2008. The letters dated April 17, and May 14, 2008, were received after issuance of the Draft EA, provided supplemental clarifying information, but did not have any impact on the Draft EA.

The Need for the Proposed Action

The proposed action permits an increase in the licensed core thermal power from 3458 MWt to 3612 MWt for the CPSES, Units 1 and 2, providing the flexibility to obtain a higher electrical output from the CPSES, Units 1 and 2.

Environmental Impacts of the Proposed Action

The licensee has submitted an environmental evaluation supporting the proposed SPU and provided a summary of its conclusions concerning the radiological and non-radiological environmental impacts of the proposed action.

Radiological Impacts

The licensee evaluated the impacts of the proposed SPU on radioactive liquid waste production, processing, discharge into the environment, resultant dose to members of the public, and impact to Squaw Creek Reservoir (SCR). There will be an increase (approximately 6.5 percent for long-lived activity) in the equilibrium radioactivity in the reactor coolant, which in turn will result in a maximum increase of 6.5 percent in the radioactivity content of the liquid releases. Tritium levels are also expected to increase by 6.5 percent in the discharged liquid. This will result in increased aqueous tritium concentrations in the SCR.

The evaluation shows that even with the small increase in the radioactivity being discharged into the environment, the projected dose to the maximally exposed member of the public, while
