

assessment that includes only qualitative discussion. The second session is during the public review of the externally peer-reviewed draft assessment; if feasible, this draft will include both qualitative and quantitation elements (i.e., a "complete draft"). All IRIS assessments that are at the document development stage will follow the revised process, which includes the two listening sessions. However, when EPA initiated the new IRIS process, the draft assessment for carbon tetrachloride had already completed document development and been through several rounds of internal review. Therefore, EPA will only hold one listening session during the public review and comment period of the externally peer-reviewed draft.

During this teleconference, the Agency will accept oral comments from the public on technical aspects of the draft risk assessment.

DATES: The teleconference will be held on Tuesday, July 8, 2008, beginning at 12 Noon Eastern Time. Requests from members of the public who wish to make oral presentations during the teleconference will be accepted through Thursday, July 3, 2008.

ADDRESSES: Telephone conference call only. See the following **SUPPLEMENTARY INFORMATION** section for information on how to submit an oral statement during the teleconference.

FOR FURTHER INFORMATION: For general information on this teleconference, contact Ms. Thea Johnson at (703) 308-

Any member of the public who wishes to make an oral statement during the teleconference (10 minutes or less) must pre-register according to the instructions outlined in the following **SUPPLEMENTARY INFORMATION** section.

SUPPLEMENTARY INFORMATION:

Background: On August 29, 2007, EPA published a Notice of Data Availability (NODA) in the **Federal Register** that announced the availability of new information and data contained in three documents regarding the management of coal combustion wastes (CCW) in landfills and surface impoundments. (72 FR 49714.) The Agency sought public comments on how, if at all, this additional information should affect EPA's decisions as it continues to follow-up on its Regulatory Determination for CCW disposed of in landfills and surface impoundments. The three documents that the Agency requested comment on included: The joint U.S. Department of Energy (DOE) and EPA report entitled, *Coal Combustion Waste Management at Landfills and Surface Impoundments, 1994-2004*; the draft risk assessment conducted by EPA on the management of CCW in landfills and surface impoundments entitled, *Human and Ecological Risk Assessment of Coal Combustion Wastes*; and the EPA's damage case assessment. (The Agency also included in the Docket to the NODA a rulemaking petition submitted by a number of citizens' groups and several approaches, one prepared by the electric utility industry and the other prepared by a number of citizens' groups regarding the management of CCW). The Agency solicited information regarding the damage cases, the results of the risk assessment, and the new liner and groundwater monitoring information from the DOE/EPA report. EPA also requested comment on the draft risk assessment document to help inform a planned peer review, with which this notice is associated. In addition to the draft risk assessment, EPA will also make available to the peer reviewers the public comments regarding the draft risk assessment that were submitted during the comment period, which closed on February 11, 2008.

Availability of Teleconference Materials: A draft agenda and other supporting materials, including the teleconference number and instructions on how to access the teleconference telephone line will be posted on the
