

recommendations the Council considers appropriate for the improvement of Federal education programs that include Indian children or adults as participants or that may benefit Indian children or adults, and recommendations concerning the funding of any such program.

The purpose of this meeting is to provide the Council with a briefing on three new reports recently completed by the Department: The National Indian Education Study, Parts I and II, and The Status and Trends of Indian Education which will be released at the National Conference on Indian Education that starts on July 8, 2008 in Rapid City, South Dakota. The Council will also receive informational updates on State initiatives by selected State Indian Education Directors and general updates from the Department of Education. The meeting is being held as a pre-conference activity of the National Conference on Indian Education which is an activity of Executive Order 13336 on American Indian and Alaska Native Education.

Individuals who will need accommodations for a disability in order to attend the meeting (e.g., interpreting services, assistance listening devices, or materials in alternative format) should notify Cathie Carothers at (202) 260-7485 no later than July 1, 2008. We will attempt to meet requests for accommodations after this date but cannot guarantee their availability. The meeting site is accessible to individuals with disabilities.

Records are kept of all Council proceedings and are available for public inspection at the Office of Indian Education, United States Department of Education, Room 5C140, 400 Maryland Avenue, SW., Washington, DC 20202.

DEPARTMENT OF ENERGY

Bright Tomorrow Lighting Competition (L Prize™)

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice of open entry period for performance competition.

SUMMARY: Pursuant to the Energy Independence and Security Act (EISA) of 2007; Subtitle E; Section 655, the National Energy Technology Laboratory, on behalf of the Office of Energy Efficiency and Renewable Energy's Building Technologies Program, intends to accept entrants to the Bright Tomorrow Lighting Competition (L Prize™). As outlined in the EISA, the DOE is accepting entries of Solid-State Lighting (SSL) products for full performance evaluation which have the technical potential to qualify for one of two entrant categories: 60-watt incandescent replacement and PAR type 38 halogen replacement lamps. The DOE anticipates release of the twenty-first century lamp category at a future date.

DATES: The entry period for the 60-watt incandescent and PAR 38 halogen replacement lamps is now open and will remain open until a qualified winner is announced.

ADDRESSES: National Energy Technology Laboratory, 3610 Collins Ferry Road, Morgantown, WV 26505.

FOR FURTHER INFORMATION CONTACT: C. Eddie Christy, National Energy Technology Laboratory, 3610 Collins Ferry Road, MS E-06, Morgantown, WV 26505, (304) 285-4604, E-mail: cchris@netl.doe.gov.

Detailed information regarding this competition is available at <http://www.lightingprize.org>.

SUPPLEMENTARY INFORMATION: The L Prize Competition is intended to encourage development and deployment of highly energy efficient solid-state lighting (SSL) products to replace several of the most common lighting products currently used in the United States, including 60-watt A19 incandescent and PAR 38 halogen lamps. To significantly impact the

national market and lighting use, the SSL products must perform similarly to the lamps they are intended to replace in terms of color appearance, light output, light distribution, and lamp shape, size, form factor, appearance and operating environment. They must be reliable, available through normal market channels, and competitively priced.

Entries to each category will be evaluated against the respective performance criteria which are based upon the statutory requirements of the EISA. Full performance specification criteria and competition details can be found at <http://www.lightingprize.org>.

Subject to the availability of funding through appropriations, EISA provides for cash prizes for each prize category. Actual cash prizes are subject to the availability of appropriated funding from future appropriations and private funding contributions as authorized by the EISA. Funding for the cash prizes is not available during fiscal year 2008; however, due to the required duration of the evaluation process, the DOE does not anticipate declaring successful entrants prior to fiscal year 2009.

In addition to cash prizes, the L Prize authorization provides that the Secretary of Energy is to consult with the Administrator of General Services to develop federal purchase guidelines with the goal of conducting a Federal procurement of SSL products from the winner under the 60-watt incandescent and PAR 38 halogen categories.

Entrants must submit 2,000 commercially acceptable quality control units which meet the full criteria specified at <http://www.lightingprize.org>.

Issued in Morgantown, WV on June 10, 2008.

C. Edward Christy,

Division Director, Buildings & Industrial Technologies Division.
