Title: 7 CFR Part 1724, Electric Engineering, Architectural Services and Design Policies and Procedures.

OMB Control Number: 0572-0118.

Type of Request: Revision of a previously approved collection.

Abstract: The rule requires borrower to use three Rural Development contract forms under certain circumstances. The use of standard forms helps assure the Agency that:

- Appropriate standards and specifications are maintained;
- The Agency loan security is not adversely affected; and

- Loan and loan guarantee funds are used effectively and for the intended purpose.

Standardization of forms by Rural Development results in substantial savings to:

- Borrowers—If standard forms were not used, borrowers would need to prepare their own documents at significant expense; and
- Government—If standard forms were not used, each document submitted by a borrower would require extensive and costly review by both Rural Development and the Office of General Counsel.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 1.05 hours per response.

Respondents: Businesses, not-for-profit institutions and others.

Estimated Number of Respondents: 99.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 104 hours.

Copies of this information collection can be obtained from Gale Richardson, Program Development and Regulatory Analysis, at (202) 720-0992.

Fax: (202) 720-3485. E-mail: gale.richardson@wdc.usda.gov.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Dated: June 26, 2008.

SUPPLEMENTARY INFORMATION:

I. Abstract

The National Institute of Standards and Technology (NIST) sponsors the Manufacturing Extension Partnership (MEP), a national network of fifty-nine (59) locally based manufacturing extension centers working with small manufacturers to help them improve their productivity, profitability, and enhance their overall economic competitiveness.

NIST MEP surveys all clients provided substantive services and collects data on sales, investment, cost savings, and jobs impacts as well as a limited set of qualitative questions. NIST MEP surveys center clients for two primary purposes:

- To collect aggregate information on program performance indicators to report to various stakeholders on program performance. The survey provides information about the quantifiable impacts that clients attribute to the services provided by MEP centers. NIST MEP also conducts other episodic studies to evaluate the system's impact that corroborate and complement the survey results.

- To provide center-specific program performance and impact information for center use. Centers use this information to communicate results to their own stakeholders, at both the state and federal level. Center management and NIST MEP use these results to evaluate center performance and effectiveness. The MEP Center Review Criteria and review process place strong emphasis on a center's ability to demonstrate impacts based on the survey results.

The specific information obtained from clients about the impact of MEP services is essential for NIST officials to monitor and report on program performance and plan program improvements aimed at improving program efficiency and effectiveness. This information is not available from existing programs or other sources. The collection of information is currently conducted by a contractor. This submission under the Paperwork

Reduction Act represents a request for an extension of a currently approved collection.
