The proposed Consent Decree resolves claims of the United States, on behalf of the Environmental Protection Agency ("EPA"), under the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C. 9601 *et seq.*, in connection with the Nepera Chemical Company Superfund Site in the Town of Hamptonburgh, Orange County, New York ("Site"), against Cambrex Corporation; Nepera, Inc.; Warner-Lambert Company LLC; and Pfizer, Inc. The proposed Consent Decree requires the defendants to perform the Remedial Design/Remedial Action ("RD/RA") set forth in the Record of Decision ("ROD") for the Site, including (a) The excavation of Site soils within former waste lagoons and placement of the soils into a biocell, using soil vapor

extraction and biological degradation technologies to reach target cleanup levels; (b) backfilling of the excavated areas of the Site which are not utilized in the construction of the biocell; (c) bioremediation of the groundwater following the removal of source-area soils by the introduction of oxygenating compounds to facilitate bioremediation through enhancement of the indigenous microbial population; and (d) implementation of a long-term groundwater monitoring program to verify that the concentrations and the areal extent of the groundwater contaminants are declining. The estimated cost of the remedy is \$3,815,000. In addition, the Consent Decree requires the defendants to reimburse EPA for its past response costs in the amount of \$495,000. The Consent Decree also obligates the defendants to pay the United States' future response costs with respect to the Site, and to implement institutional controls including restrictive covenants and an environmental easement to ensure non-interference with, and the continued effectiveness of, the ROD remedy.
