SUPPLEMENTARY INFORMATION: SDG&E

proposes to construct a new 91-mile, 500-kilovolt (kV) electric transmission line from the Imperial Valley Substation (in Imperial County, near the City of El Centro) to a new Central East Substation (in central San Diego County, southwest of the intersection of County Highways S22 and S2) and a new 59-mile, 230-kV line that includes both overhead and underground segments from the new Central East Substation to SDG&E's existing Peñasquitos Substation (in the City of San Diego). Portions of the proposed 500-kV transmission line would traverse approximately 35 miles of federal lands managed by the BLM within the California Desert Conservation Area in Imperial County, and approximately 1 mile of BLM-administered land in San Diego County. The remainder of the proposed project would cross lands owned by various entities including the State of California, local governments, and private parties.

On January 3, 2008, the CPUC and BLM published a Draft EIR/EIS on the Sunrise Powerlink Project. The Draft EIR/EIS contained 7500+ pages in six volumes. It included an analysis of the proposed project's effects, as well as an analysis of future possible transmission lines and "connected actions" that are likely to be built if the Sunrise Powerlink Project is built. The Draft EIR/EIS also identified alternatives to the proposed project (including the No Action Alternative) and evaluated their expected environmental impacts.
