SUPPLEMENTARY INFORMATION:

I. Abstract

The objective of these surveys is to assess the level of awareness on issues related to regulations preventing feeding/harassment of wild bottlenose dolphins, which are protected under the Marine Mammal Protection Act. In particular, the surveys are designed to determine what commercial operators and the general public know about specific regulations prohibiting feeding and harassment of bottlenose dolphins, and how they gained their knowledge and/or perceptions on the topic. The initial geographic region for this survey is Panama City, Florida, where numerous incidences of dolphin harassment and feeding have been documented. The intent is to also use this survey in other areas of the southeast region to gain a similar understanding and ensure outreach messages are appropriate for intended audiences.

The recordkeeping and reporting requirements at 50 CFR part 679 form the basis for this collection of information. The National Marine Fisheries Service (NMFS) will request information from local residents, tourists and commercial businesses through a one-time survey. This information, upon receipt, will be used to develop effective and better-targeted outreach efforts in order to enhance bottlenose dolphin conservation in Florida.

II. Method of Collection

Participants voluntarily complete paper questionnaires and methods of submittal include on-site, mail, and facsimile transmission of paper forms.
