

Alternative C's habitat management objectives are identical to Alternative B and quite similar to Alternative A. Concerning resource protection, Alternative C would replicate Alternative B's objectives, but in addition, would install and maintain one or more remote automated water quality monitoring devices/stations and further increase control of invasive species, including monitoring for the presence of kudzu and feral swine.

Alternative C would provide increased visitor services over those offered by the first two alternatives, and provide for increases in each of the six priority public uses. As in Alternative B, visitor services would be under the guidance of a Visitor Services' Plan. A park ranger would annually offer 30 interpretive programs, including offering or hosting interpreted kayak excursions. The refuge would further expand outreach by increasing off-refuge programs, news releases, and Web site updates.
