

Commission requests respondents to submit information which respondents believe is confidential, respondents may request confidential treatment of such information pursuant to section 0.459 of the Commission's rules, 47 CFR Section 0.459.

Needs and Uses: The Commission requires Tier 1 local exchange carriers (LECs) to provide expanded opportunities for third-party interconnection with their interstate special access facilities. The LECs are permitted to establish a number of rate zones within study areas in which expanded interconnection is operational. In the *Fifth Report and Order* in CC Docket No. 96-262, the Commission allows price cap LECs to define the scope and number of zones within a study area. These LECs must file and obtain approval of their pricing plans which will be used by FCC staff to ensure that the rates are just, reasonable and nondiscriminatory.

any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a valid OMB control number.

Needs and Uses: In 2003, the Commission modified 47 CFR Section 20.18(l) to further improve the ability of public safety answering points (PSAPs) to respond quickly and efficiently to calls for emergency assistance made from non-service initialized wireless mobile handsets. Non-service-initialized wireless mobile handsets (non-initialized handsets) are not registered

for service with any Commercial Mobile Radio Service (CMRS) licensee. A non-initialized handset lacks a dialable number, but is programmed to make outgoing 911 calls. The Commission addressed issues arising from the inability of a PSAP operator to call back a 911 caller who becomes disconnected when using a non-service-initialized wireless handset. These requirements also apply to manufacturers of 911-only handsets that are manufactured after May 3, 2004.
