plan describing the proposed approaches to assessing exposures and characterizing risks is described in the draft document, *Sulfur Dioxide Health Assessment Plan: Scope and Methods for Exposure and Risk Assessment.* This document was released for public review and comment in November 2007 and was the subject of a consultation with the Clean Air Scientific Advisory Committee (CASAC) on December 5 and 6, 2007. Comments received from that consultation have been considered in developing the draft risk and exposure assessment document being released at this time.

The draft document being released at this time conveys the approach taken to assess exposures to ambient SO_2 and to characterize associated health risks, as well as to present the results of those assessments. This draft document will be available online at: *http://www.epa.gov/ttn/naaqs/standards/so2/s_so2_cr_rea.html.*

The EPA is soliciting advice and recommendations from the CASAC by means of a review on the draft document at an upcoming public meeting of the CASAC scheduled for July 30–31, 2008 in Research Triangle Park, NC. Following the CASAC meeting, EPA will consider comments received from the CASAC and the public in preparing a second draft risk and exposure assessment report. The release of the second draft report will be followed by another CASAC meeting which will be announced in a future **Federal Register** notice and ultimately EPA will release a final risk and exposure assessment document taking into consideration comments from the CASAC and public.
