

the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of this filing and all subsequent filings made with the Commission and must mail a copy of all filings to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, other persons do not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to FGT's request. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to this project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only in support of or in opposition to FGT's request should submit an original and two copies of their comments to the Secretary of the Commission. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the applicant. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests, and interventions via the internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site (www.ferc.gov) under the "e-Filing" link.

Specifically, ANR proposes to construct and install a new interconnect on ANR's 24-inch 503 line, to receive LNG from KMLP that directly connects to the Cheniere Sabine Pass LNG terminal, located in Cameron Parish, Louisiana. ANR will construct one sixteen-inch tap and valve, one sixteen-inch check valve, one sixteen-inch block valve, approximately 75-feet of 16-inch interconnecting pipe, over-pressure equipment, communications, and electronic gas measurement (EGM). ANR estimates the cost of construction to be \$414,000, with all costs associated with such facilities to be reimbursed by KMLP. ANR states that the addition of the proposed interconnect will have no significant impact on ANR's peak day or annual deliveries. KMLP will construct, own, and operate the meter station, and will be designed for flow capability of up to 200 MMcf/d.
