Assessment will be reviewed and updated, and the NPS will evaluate additional avalanche mitigation techniques and risk assessment tools in order to further improve safety and visitor access.

From March 2 to March 15, the NPS will maintain the road segment from the East Entrance to a point approximately four miles west of the entrance station to provide for opportunities for cross-country skiing and snowshoeing. Limited snowmobile and snowcoach use will be allowed in order to provide drop-offs for such purposes.

This course of action and seven alternatives were analyzed in the Draft and Final Environmental Impact Statements. The full range of foreseeable environmental consequences was assessed, and appropriate mitigation measures were identified.

The Amendment includes a statement of the decision made, synopses of other alternatives considered, the basis for the decision, a description of the environmentally preferred alternative, a finding on impairment of park resources and values, and an overview of the public and agency involvement in reaching this Record of Decision Amendment.

On December 13, 2007, a final regulation was published in the **Federal Register** (72 FR 70781), which implemented certain provisions of the November 20, 2007 Record of Decision. The National Park Service has reviewed the regulation (36 CFR 7.13) and determined that promulgating a new regulation to implement this Amendment is not necessary.
