SUPPLEMENTARY INFORMATION:

Background:

Eight Federal agencies have been cooperating under a new Memorandum of Understanding (MOU) on the research and development of multimedia environmental models for the past year. The new MOU continues a previous 5 year effort that began in 2001 and establishes a framework facilitating cooperation and coordination among the following agencies (the specific research organization within the agency is in parentheses): U.S. Army Corps of Engineers (Engineer Research and Development Center); U.S. Department of Agriculture (Natural Resources Conservation Service); U.S. Department of Energy (Office of Biological and Environmental Research); U.S. Environmental Protection Agency; U.S. Geological Survey; U.S. National Oceanographic and Atmosphere Administration; U.S. Nuclear Regulatory Commission (Office of Nuclear Regulatory Research); and U.S. Bureau of Reclamation. These agencies are cooperating and coordinating in the research and development of multimedia environmental models, software and related databases, including development, enhancements, applications and assessments of site specific, generic, and process-oriented multimedia environmental models as they pertain to human and environmental health risk assessment. Multimedia model development and simulation supports interagency interests in risk assessment, uncertainty analyses, water supply issues and contaminant transport.

Proposed Agenda: The ISCMEM Chair will open the meeting with a brief overview of the goals of the MOU and an update on current activities of ISCMEM. This introduction will be followed by a series of invited presentations throughout the morning focusing on topics of mutual interest to ISCMEM participants. NUCLEAR REGULATORY COMMISSION

[Docket No. 50-302]

Florida Power Corporation; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (NRC, the Commission) has granted the request of Florida Power Corporation (FPC, the licensee) to withdraw its July 31, 2007, application for proposed amendment to Facility Operating License No. DPR-72 for the Crystal River Unit 3 Nuclear Generating Plant (CR-3) located in Citrus County, Florida.

The proposed amendment would have revised the technical specifications to impose more restrictive voltage and frequency limits during surveillance testing of the emergency diesel generators.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on January 29, 2008 (73 FR 5222). Subsequently, by letter dated June 19, 2008 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML081770040), the licensee withdrew the amendment request, and stated that FPC will continue to maintain administrative control of the emergency diesel generator voltage and frequency limits as described in the referenced license amendment request (LAR) submittal. In addition, the licensee plans to resubmit this LAR under a new identification number after additional evaluations have been completed.

Further on July 24, 2008, in response to the NRC staff request for additional

information, FPC: (1) Explained the basis for withdrawal of the amendment request, (2) committed to resubmit the amendment by November 7, 2008, and (3) provided assurance that the short term administrative controls, taken as corrective action in accordance with the guidance contained in NRC Administrative Letter 98-10, are effective and will remain in place until the LAR implementation.

For further details with respect to this action, see the application for amendment dated July 31, 2007, and the licensee's letters dated June 19 and July 24, 2008, which withdrew the application for license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the ADAMS Public Electronic Reading Room on the internet at the NRC Web site, <http://www.nrc.gov/reading-rm.html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC PDR Reference staff by telephone at 1-800-397-4209 or 301-415-4737, or by e-mail to pdr@nrc.gov.
