

macadamia, blackberry, raspberries, broccoli, Brussels sprouts, cabbage, collards, carrots, okra, guava, hops, fig, chestnut, chayote, turnip, pea, mustard green, beets (garden), horseradish, parsnip, rutabaga, radish, salsify, sweet potato, mint, and asparagus. Although, IR-4 also endeavored to support the use of malathion on flax, apples, quince, celery, and swiss chard, the data submitted did not prove wholly adequate to support reregistration of these uses. As these uses were supported during the development of the malathion Reregistration Eligibility Decision (RED), EPA will accept the submission of data specified in the RED as necessary to maintain the registration of these uses.

The malathion uses identified in Unit II above remain unsupported. Cheminova did not withdraw its voluntary request for termination of these uses, and no other party has committed to produce data sufficient to support these uses. Cheminova did not commit to support the reregistration of these uses and did not submit supporting data as required in phases 2 and 3 of reregistration (FIFRA section 4(d) and (e)), and so, these uses were not fully evaluated in the malathion Reregistration Eligibility Decision. Accordingly, EPA hereby grants, in part, the requested registration amendments and orders the termination of the malathion uses identified in Unit II above.

IV. Cancellation Order

Pursuant to FIFRA section 6(f), EPA hereby approves the requested amendments to terminate those uses of malathion identified in Unit II above. Accordingly, the Agency orders that the registration of Fyfanon Technical, EPA Reg. No. 4787-5, is hereby amended to terminate the uses identified in Unit II above. Any distribution, sale, or use of existing stocks of Fyfanon Technical, EPA Reg. No. 4787-5, in a manner inconsistent with any of the Provisions for Disposition of Existing Stocks set forth in Unit VI below, will be considered a violation of FIFRA.

V. What is the Agency's Authority for Taking this Action?

Section 6(f)(1) of FIFRA provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled or amended to terminate one or more uses. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**. Thereafter, following the public comment period,

the Administrator may approve such a request.

VI. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which were packaged, labeled, and released for shipment prior to the effective date of the cancellation action. The cancellation order issued in this notice includes the following existing stocks provisions.

1. The registrant may continue to sell and distribute existing stocks of Fyfanon Technical, EPA Reg. No. 4787-5, with previously approved labeling that includes uses terminated by this cancellation order, until February 27, 2009.

2. Persons other than the registrant may continue to sell and/or distribute existing stocks of Fyfanon Technical, EPA Reg. No. 4787-5, with previously approved labeling that includes the terminated uses until such stocks are exhausted.

3. Persons other than the registrant may continue to use existing stocks of Fyfanon Technical, EPA Reg. No. 4787-5, with previously approved labeling that includes the terminated uses, provided that they are not used to formulate products labeled for any use described in Unit II. of this cancellation order, until such stocks are exhausted.
