Approval and Promulgation of Air Quality Implementation Plans; Maryland; NO_x and SO₂ Emissions Limitations for Fifteen Coal-Fired Electric Generating Units

AGENCY: Environmental Protection Agency (EPA).

ACTION: Partial withdrawal of proposed rule.

SUMMARY: EPA is withdrawing a portion of a proposed rule pertaining to a State of Maryland State Implementation Plan (SIP) revision that establishes tonnage caps for emissions of nitrogen oxides (NO_x) and sulfur dioxide (SO₂) from 15 coal-fired electric generating units. The proposed rule was published on January 10, 2008 (73 FR 1851). EPA is withdrawing a provision of the rule that Maryland requested we take no further action on. EPA has determined that the provision has no impact on the remainder of the rule, which is being finalized by separate document. This SIP action is being taken under the Clean Air Act (CAA).

DATES: The proposed rule for COMAR 26.11.27.03B(7)(a)(iii) is withdrawn as of September 4, 2008.

FOR FURTHER INFORMATION CONTACT: Marilyn Powers at (215) 814–2308, or by e-mail at powers.marilyn@epa.gov.

SUPPLEMENTARY INFORMATION: See the information provided in the proposed rule entitled, “Approval and Promulgation of Air Quality Implementation Plans; Maryland; NO_x and SO₂ Emissions Limitations for Fifteen Coal-Fired Electric Generating Units,” located in the Proposed Rules section of the January 10, 2008 **Federal**

Register (73 FR 1851). On June 23, 2008, the Maryland Department of the Environment (MDE) submitted a letter withdrawing a portion of their July 12, 2007 submittal. The withdrawal only affects COMAR 26.11.27.03B(7)(a)(iii). This provision requires a unit that exceeds its ozone season NO_x emissions limit to surrender ozone season NO_x allowances equivalent to the number of tons of NO_x emitted in excess of the limit. The June 23, 2008 letter requested that EPA finalize its rulemaking with respect to the rest of the SIP Revision that is not withdrawn. EPA determined that withdrawal of COMAR 26.11.27.03B(7)(a)(iii) does not impact the other requirements in COMAR 26.11.27 and is severable. The other portions of the January 10, 2008 proposed rule are not affected, and are being finalized in a separate notice.

Approval and Promulgation of Implementation Plans; Georgia; Prevention of Significant Deterioration and Nonattainment New Source Review Rules

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to partially approve and disapprove portions of revisions to the Georgia State Implementation Plan (SIP) submitted by the State of Georgia in three submittals dated October 31, 2006, March 5, 2007, and August 22, 2007. The proposed revisions modify Georgia’s Prevention of Significant Deterioration (PSD) and Nonattainment New Source Review (NNSR) permitting rules in the SIP to address changes to the federal New Source Review (NSR) regulations, which were promulgated by EPA on December 31, 2002, and reconsidered with minor changes on November 7, 2003 (collectively, these two final actions are

referred to as the “2002 NSR Reform Rules”). The proposed revisions include provisions for baseline emissions calculations, an actual-to-projected-actual methodology for calculating emissions changes, options for plantwide applicability limits, and recordkeeping and reporting requirements. EPA is proposing to approve Georgia’s NSR rule revisions, with the exception of one NNSR provision. EPA is proposing to disapprove the State’s incorporation of “baseline emissions calculations” into the Georgia NNSR provisions for the generation of Emissions Reductions’ Credits to be used as offsets.
