All of the six original participants in the "Semi-Monthly Statement Processing Prototype" have terminated their involvement in the program in favor of participation in the ACE-based process. The Automated Commercial Environment portal system for Periodic Monthly Payment statement processing has been deployed nationwide thereby ending the need for the semi-monthly filing program. Therefore, this notice formally announces the termination of the "Semi-Monthly Statement Processing Prototype" under the NCAP.

SUPPLEMENTARY INFORMATION:

Introduction

With this notice, we initiate our process for developing a CCP for San Luis and Merced NWRs and the Grasslands WMA in Merced County, CA. This notice complies with our CCP policy to: (1) Advise other Federal and State agencies, Tribes, and the public of our intention to conduct detailed planning on this refuge and (2) obtain suggestions and information on the scope of issues to consider in the environmental document and during development of the CCP.

Background

The CCP Process

The National Wildlife Refuge System Improvement Act of 1997 (16 U.S.C. 668dd-668ee) (Improvement Act), which amended the National Wildlife Refuge System Administration Act of 1966, requires us to develop a CCP for each national wildlife refuge. The purpose for developing a CCP is to provide refuge managers with a 15-year plan for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System,

consistent with sound principles of fish and wildlife management, conservation, legal mandates, and our policies. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation and photography, and environmental education and interpretation. We will review and update the CCP at least every 15 years in accordance with the Improvement Act.

Each unit of the National Wildlife Refuge System is established for specific purposes. We use these purposes as the foundation for developing and prioritizing the management goals and objectives for each refuge within the National Wildlife Refuge System mission, and to determine how the public can use each refuge. The planning process is a way for us and the public to evaluate management goals and objectives that will ensure the best possible approach to wildlife, plant, and habitat conservation, while providing for wildlife-dependent recreation opportunities that are compatible with each refuge's establishing purposes and the mission of the National Wildlife Refuge System.

Our CCP process provides participation opportunities for Tribal, State, and local governments; agencies; organizations; and the public. At this time we encourage input in the form of issues, concerns, ideas, and suggestions for the future management of San Luis and Merced NWRs and the Grasslands WMA.

We will conduct the environmental review of this project in accordance with the requirements of the National Environmental Policy Act of 1969, as amended (NEPA) (42 U.S.C. 4321 *et seq.*); NEPA regulations (40 CFR parts 1500-1508); other appropriate Federal laws and regulations; and our policies and procedures for compliance with those laws and regulations.

San Luis and Merced NWRs and Grasslands WMA

The San Luis and Merced NWRs and Grasslands WMA are in Merced County, California, adjacent to the communities of Los Banos and Merced. They are situated within the San Joaquin River watershed in the San Joaquin Valley.

Collectively, these three units of the National Wildlife Refuge System contain one of the largest contiguous freshwater wetlands remaining in California, which provides important winter habitat for millions of migratory birds, as well as assemblages of other

native wetland- and grassland-dependent wildlife.

The Merced NWR was established in 1951 and consists of 10,262 acres. The San Luis NWR was established in 1967 and consists of 26,878 acres. The Grasslands WMA was established in 1979 and contains more than 190 privately-owned parcels under Service conservation easements totaling approximately 90,000 acres, within an approved acquisition boundary of 230,000 acres.
