

demonstrate the feasibility of CARB's OBD requirements. I cannot find that CARB's OBD regulations, as noted, would cause the California motor vehicle emission standards to be inconsistent with section 202(a).

A full explanation of EPA's decision, including our review of comments received, is contained in a Decision Document which may be obtained as explained above.

My decision will affect not only persons in California but also the manufacturers outside the State who must comply with California's requirements in order to produce heavy-duty vehicles and engines for sale in California. For this reason, I hereby determine and find that this is a final action of national applicability.

As with past waiver decisions, this action is not a rule as defined by Executive Order 12866. Therefore, it is exempt from review by the Office of Management and Budget as required for rules and regulations by Executive Order 12866.

In addition, this action is not a rule as defined in the Regulatory Flexibility Act, 5 U.S.C. 601(2). Therefore, EPA has not prepared a supporting regulatory flexibility analysis addressing the impact of this action on small business entities.

Finally, the Administrator has delegated the authority to make determinations regarding waivers under section 209(b) of the Act to the Assistant Administrator for Air and Radiation.

Dated: August 13, 2008.

Robert J. Meyers,

*Principal Deputy Assistant Administrator,
Office of Air and Radiation.*
