B. What Information Is EPA Particularly Interested in?

Pursuant to section 3506(c)(2)(A) of the Paperwork Reduction Act (PRA), EPA is soliciting comments and information to enable it to:

1. Evaluate whether the proposed collections of information are necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.
2. Evaluate the accuracy of the Agency's estimates of the burdens of the proposed collections of information.
3. Enhance the quality, utility, and clarity of the information to be collected.
4. Minimize the burden of the collections of information on those who are to respond, including the use of appropriate automated or electronic collection technologies or other forms of information technology, e.g., permitting electronic submission of responses.

7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

II. ICR To Be Renewed

A. For All ICR

The Agency computed the burden for each of the recordkeeping and reporting requirements applicable to the industry for the currently approved ICR listed in this notice. Where applicable, the Agency identified specific tasks and made assumptions, while being consistent with the concept of the PRA.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions to: Develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The listed ICR address Clean Air Act (CAA) information collection requirements in standards (i.e., regulations) which have mandatory recordkeeping and reporting requirements. Records collected under the national emission standards for hazardous air pollutants (NESHAP) must be retained by the owner or operator for at least 5 years. In general, the required collections consist of emissions data and other information deemed not to be private.

In the absence of such information collection requirements, enforcement personnel would be unable to determine whether the standards are being met on

a continuous basis as required by the CAA.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the Agency displays a currently valid OMB control number. The OMB control numbers for EPA's regulations under Title 40 of the Code of Federal Regulations are published in the **Federal Register**, or on the related collection instrument or form. The display of OMB control numbers for certain EPA regulations is consolidated at 40 CFR part 9.

II. Background

EPA's Office of Pesticide Programs (OPP) is entrusted with the responsibility to help ensure the safety of the American food supply, the education and protection from unreasonable risk of those who apply or are exposed to pesticides occupationally or through use of products, and general protection of the environment and special ecosystems from potential risks posed by pesticides. The Charter for EPA's Pesticide Program Dialogue Committee (PPDC) was established under the Federal Advisory Committee Act (FACA), Public Law 92-463, in September 1995, and was renewed November 2, 2007, for another 2-year period. The purpose of PPDC is to provide advice and recommendations to the EPA Administrator on issues associated with pesticide regulatory development and reform initiatives, evolving public policy and program implementation issues, and science issues associated with evaluating and reducing risks from use of pesticides. It is determined that PPDC is in the public interest in connection with the performance of duties imposed on the Agency by law. The following sectors are represented on the PPDC: Pesticide industry and trade associations; environmental/public interest, consumer, and animal rights groups; farm worker organizations; pesticide user, grower, and commodity groups; Federal and State/local/Tribal governments; the general public; academia; and public health organizations. The objective of the PPDC Work Group on Web-Distributed Labeling is to provide advice regarding a process to ensure that the most current version of pesticide labeling is available to purchasers and users electronically. Copies of the PPDC Charter are filed with appropriate committees of Congress and the Library of Congress and are available upon request.

III. How Can I Request to Participate in this Meeting?

PPDC meetings are open to the public and seating is available on a first-come basis. Persons interested in attending do not need to register in advance of the meeting.
