SUPPLEMENTARY INFORMATION:

Summary of Information Collection

(All respondents are authorized patrons by DoD regulations, unless otherwise described.)

Commissary Sizing Survey

Surveys will support commissary renovation and new construction. Survey results will be used to help determine market potential and associated commissary size requirements.

Facility Site Decisions

Surveys will support commissary site decisions. Where applicable, commissary user preference can be incorporated into the site location decision process. Patrons will input their answers to questions concerning where they would like a new facility located, as well as give their opinions and concerns that will affect their shopping experience. The survey results will also be used to estimate where the commissary users are located through the use of population density maps.

Patron Migration Survey

These surveys will aid in predicting the impact to commissaries that are near a closing commissary or a commissary that is undergoing some kind of transformation that may cause commissary users to migrate to an alternative nearby commissary. The results will be used to determine requirements for the nearby receiving commissaries.

Commissary Operational Surveys

These surveys will supply information on various processes within the commissaries. The surveyed population could be commissary customers, employees within the Agency, vendors, distributors, or contractors. Persons surveyed will not necessarily be authorized commissary users.

Market Basket Price Surveys

These surveys will be administered to commissary eligible personnel to assess their perception of our savings compared to local commercial supermarkets.

Demographic Surveys

This survey will be conducted, as needed, to assess the demographic make-up of commissary users. The results may be used in conjunction with population data to reveal differences in key demographics such as status, family size, distance from a commissary, age, service membership, and military grade.
