

Stamp products. The company official stated that some of the petitioning workers may have loaded software of the Stamp Expressions product on the servers and/or connected the software to the network.

The petitioner further alleged that production of the above-mentioned articles has been shifted to India and thus workers of the Tech Central Infrastructure & Support Services, Danbury, Connecticut should be eligible for TAA.

The company official denied this allegation and stated that production of postage meters, custom stamps, and similar Pitney Bowes equipment is continuing to be produced in the United States and that there was no shift in production of these articles to India or any other foreign country.

The company official stated that some information support functions have been outsourced to a third party vendor, both in the United States and India. However, this outsourcing does not include any outsourcing in production.

The allegation of a shift to another country might be relevant if it was determined that workers of the subject firm produced an article. Since the investigation determined that workers of Pitney Bowes, Tech Central Infrastructure & Support Services, Danbury, Connecticut do not produce an article, there can not be imports nor a shift in production of an "article" abroad within the meaning of the Trade Act of 1974 in this instance.

Conclusion

After reconsideration, I affirm the original notice of negative determination of eligibility to apply for worker adjustment assistance for workers and former workers of Pitney Bowes, Tech Central Infrastructure & Support Services, Danbury, Connecticut.

Signed at Washington, DC, this 9th day of September, 2008.

Elliott S. Kushner,

Certifying Officer, Division of Trade Adjustment Assistance.
