

Alternative B would result in less than 57 percent of the initial surface disturbance anticipated under the proposed action and less than 55 percent of the long-term surface disturbance. The decrease in surface disturbance would result in fewer impacts to the natural resources within the RDPA. In addition, the selection of the Alternative B incorporates the implementation of various avoidance, minimization, and mitigation measures.

ACTION: Notice of availability of a Supplemental Draft Environmental Impact Statement for the Chattahoochee River National Recreation Area General Management Plan.

SUMMARY: Pursuant to 42 U.S.C. 4332(2)(C) of the National Environmental Policy Act of 1969 and National Park Service (NPS) policy in Director's Order Number 2 (Park Planning) and Director's Order Number 12 (Conservation Planning, Environmental Impact Analysis, and Decision-making) the NPS announces the availability of a Supplemental Draft Environmental Impact Statement/General Management Plan (SDEIS/GMP) for the Chattahoochee River National Recreation Area (CRNRA) in the Atlanta, Georgia metropolitan area.

The document provides a framework for management, use, and development options for the CRNRA by the NPS for the next 15 to 20 years. The document describes six management alternatives for consideration, including a no-action alternative that continues current management policies, and analyzes the environmental impacts of those alternatives. The CRNRA includes a maximum of 10,000 acres of land in 16 units distributed along a 48-mile corridor between Peachtree Creek, Atlanta, and Buford Dam. The CRNRA is linear corridor surrounded by rapidly developing urban and suburban areas.

DATES: Written comments regarding the SDEIS/GMP must be post marked no later than 60 days from the Environmental Protection Agency's publication of its Notice of Availability in the **Federal Register**.

Many reviewers objected to some of the provisions of the alternative management strategies that were proposed in the draft plan. In consultation with the Georgia Department of Natural Resources the NPS made major revisions to the plan document including the development of two new alternatives. Subsequently, the NPS held public, stakeholder, and consulting party meetings to gather advice and feedback on the proposed new alternatives for the future management of the CRNRA. The input from the meetings assisted the NPS in developing these new alternatives for managing the cultural and natural
