Federal Register

Vol. 73, No. 186

Wednesday, September 24, 2008

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

[NRC-2008-0263; PRM-50-91]

RIN 3150-A141

Technical Specifications—Restoring the Original Paragraph Designations

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is amending its regulations to resolve an administrative issue raised in a petition for rulemaking (PRM) submitted by the Strategic Teaming and Resource Sharing (STARS) Integrated Regulatory Affairs Group (PRM-50-91). In this final rule, the NRC is restoring the original paragraph designations as existed in 10 CFR 50.36 before the 2007 Part 52 final rulemaking. This final rule eliminates the need for licensees to expend resources on administrative redesignations that have no safety benefit.

DATES: *Effective Date:* October 24, 2008.

SUPPLEMENTARY INFORMATION:

Background

The Nuclear Regulatory Commission is amending the regulations in 10 CFR Part 50 to revise 10 CFR 50.36, "Technical Specifications," and thereby resolve administrative issues raised in PRM-50-91 submitted by the STARS Integrated Regulatory Affairs Group.

On August 28, 2007, (72 FR 49351) the final rule for Part 52, "Licenses, Certifications, and Approvals for Nuclear Power Plants," redesignated § 50.36(c), (d), and (e) as paragraphs (d), (e), and (f), respectively, and added a new paragraph (c) to 10 CFR 50.36. The insertion of this new paragraph caused the paragraph for the technical specification criteria to be redesignated from 10 CFR 50.36(c) to 10 CFR 50.36(d). The redesignation of these paragraphs requires many licensees of operating nuclear power plants to modify their technical specifications, final safety analysis reports, and plant plans and procedures to correctly reference the redesignated § 50.36(d). This would require substantial expenditures of licensee resources with no corresponding benefit to public health and safety, common defense and security, or protection of property from radiological events. By restoring the original paragraph designation, the final rule benefits all operating nuclear power plants by obviating the need for licensees to expend their resources on administrative corrections.

Petition for Rulemaking

On April 11, 2008, Mr. T. Moser, Chairman, STARS Integrated Regulatory Affairs Group, submitted a petition for rulemaking, docketed PRM-50-91. Mr. Moser requested that the NRC correct a paragraph numbering conflict introduced by a final rule "Licenses, Certifications, and Approvals for Nuclear Power Plants" (August 28, 2007; 72 FR 49351). The petitioner asserts that by granting the petition, potential error will be prevented by eliminating the need to identify and process conforming changes which reflect the redesignated paragraphs. There are many licensee and NRC documents affected such as Technical Specification Bases, implementing operation procedures, training programs, Technical Specification Task Force Travelers, NUREGs, Regulatory Guides, NRC office instructions, NRC Management Directives, and SECY papers. The petitioner asserts that significant industry and NRC effort to update documents to correct references to 10 CFR 50.36(c) is burdensome with no safety benefit.

Rule Change

The NRC has determined that the issue raised by PRM-50-91 can be resolved through an administrative rulemaking which restores the original paragraph designations. In this final rule, the NRC is restoring the original paragraph designations as existed in § 50.36 before the 2007 Part 52 rulemaking. In addition, the NRC is redesignating the new paragraph (c) which was adopted in the 2007 Part 52 final rulemaking as a new paragraph (a)(2). The existing text of paragraph (a) is being redesignated as paragraph (a)(1). The NRC believes that this redesignation of paragraph (a) will not result in any cross-referencing issues, inasmuch as any reference to § 50.36(a) will continue to be valid with the redesignation. The NRC also believes it is unlikely that any technical specifications, final safety analysis reports, or plant procedures actually reference paragraph (a) given the subject matter of that paragraph. This final rule closes the docket on PRM-50-91.

Rulemaking Procedure

Because this amendment constitutes a minor administrative correction to the regulations, the notice and comment

provisions of the Administrative Procedure Act do not apply pursuant to 5 U.S.C. 553(b)(B).

Environmental Impact: Categorical Exclusion

The NRC has determined that this final rule is the type of action described in categorical exclusion under 10 CFR 51.22(c)(2). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this final rule.

Paperwork Reduction Act Statement

The final rule does not contain information collection requirements subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Public Protection Notification

The NRC may not conduct or sponsor, and a person is not required to respond to, a request for information of an information collection requirement unless the requesting document displays a currently valid OMB control number.

Congressional Review Act

In accordance with the Congressional Review Act of 1996, the NRC has determined that this action is not a major rule and has verified this determination with the Office of Information and Regulatory Affairs of OMB.

Pacific Halibut Fisheries; Subsistence Fishing

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues a final rule to amend the subsistence fishery rules for Pacific halibut in waters in and off Alaska. These regulations are necessary to address subsistence halibut management concerns, particularly in densely populated areas. This action is intended to support the conservation

and management provisions of the Northern Pacific Halibut Act of 1982.

DATES: Effective October 24, 2008.

ADDRESSES: Copies of the Categorical Exclusion (CE), Regulatory Impact Review (RIR), and Final Regulatory Flexibility Analysis (FRFA) prepared for this action, as well as the environmental assessment (EA) prepared for the original subsistence halibut action (68 FR 18145; April 15, 2003) are available by mail from NMFS, Alaska Region, P. O. Box 21668, Juneau, AK 99802–1668, Attn: Ellen Sebastian, Records Officer; in person at NMFS, Alaska Region, 709 West 9th Street, Room 420A, Juneau, Alaska; or via the Internet at the NMFS Alaska Region website at <http://www.alaskafisheries.noaa.gov>.

Written comments regarding the burden-hour estimates or other aspects of the collection-of-information requirements contained in this final rule may be submitted to NMFS at the above address and by e-mail to David_Rostker@omb.eop.gov, or fax to 202–395–7285.

SUPPLEMENTARY INFORMATION:

Management of the Pacific halibut (hereafter halibut) fishery in and off Alaska is based on an international agreement between Canada and the United States. This agreement, entitled the “Convention between the United States of America and Canada for the Preservation of the Halibut Fishery of the Northern Pacific Ocean and Bering Sea” (Convention), was signed at Ottawa, Canada, on March 2, 1953, and amended by the “Protocol Amending the Convention,” signed at Washington, D.C., March 29, 1979. The Convention, administered by the International Pacific Halibut Commission (IPHC), is given effect in the United States by the Northern Pacific Halibut Act of 1982 (Halibut Act).

The IPHC promulgates regulations pursuant to the Convention. The IPHC’s regulations are subject to approval by the Secretary of State with concurrence from the Secretary of Commerce (Secretary). After approval by the Secretary of State and the Secretary, the IPHC regulations are published in the **Federal Register** as annual management measures pursuant to 50 CFR 300.62. NMFS published the IPHC’s current annual management measures on March 7, 2008 (73 FR 12280).

The Halibut Act authorizes the North Pacific Fishery Management Council (Council) to develop halibut fishery regulations, including limited access regulations, in its geographic area of concern that would apply to nationals
