SUPPLEMENTARY INFORMATION: The HIHWNMS Advisory Council was established in March 1996 to assure continued public participation in the management of the sanctuary. Since its establishment, the council has played a vital role in the decisions affecting the Sanctuary surrounding the main Hawaiian Islands.

The council's 17 voting members represent a variety of local user groups, as well as the general public.

The council is supported by three committees: A Research Committee chaired by the Research Representative, an Education Committee chaired by the Education Representative, and a Conservation Committee chaired by the Conservation Representative, each respectively dealing with matters concerning research, education and resource protection.

The council represents the coordination link between the sanctuary and the state and federal management agencies, user groups, researchers, educators, policy makers, and other various groups that help to focus efforts and attention on the humpback whale and its habitat around the main Hawaiian Islands.

The council functions in an advisory capacity to the sanctuary management and is instrumental in helping to develop policies and program goals, and to identify education, outreach, research, long-term monitoring, resource protection and revenue enhancement priorities. The council works in concert with the sanctuary management by keeping him or her informed about issues of concern throughout the sanctuary, offering recommendations on specific issues, and aiding in achieving the goals of the sanctuary within the context of Hawai'i's marine programs and policies.
