significant contributions to our national heritage of certain historic and cultural lands, waterways and structures within the states of Massachusetts and Rhode Island. The heritage corridor was to provide a management framework to assist the states of Massachusetts and Rhode Island and their units of local government in the development and implementation of integrated cultural, historical and land resource management programs in order to retain, enhance and interpret the significant values of the lands, waters and structures of the corridor.

The purpose of this Special Resource Study/EIS is to provide Congress with information about the national significance, suitability, and feasibility of sites and landscape features within the corridor that are associated with American industrial history for possible inclusion in the National Park System. The study will develop alternative options for management and interpretation of the sites and landscape features under consideration.

The draft report of the study, with the draft EIS, is expected to be completed and available for public review by late 2009.

Alternatives Evaluated
Alternative 1: No Action (Continuation of Existing Conditions)
Under Alternative 1, the No Action Alternative, NPS would continue to manage the natural, cultural, and recreational resources of Curecanti National Recreation Area (NRA), and associated facilities, pursuant to Reclamation law, NPS law, the 1965 Memorandum of Agreement between NPS and Reclamation (1965 MOA), and other applicable laws and regulations. Reclamation would continue to manage the three dams and reservoirs, power plants, access roads, and other related facilities, to meet the purposes of the Colorado River Storage Project Act (CRSP); would continue to manage the East Portal area to meet the purposes of the Uncompahgre Project; and would continue to have unrestricted access to their lands and land interests, water and water interests, and facilities; pursuant to Reclamation law, the 1965 MOA, and other applicable laws and regulations. There would be no significant change in the NRA boundary. However, a permanent NPS presence would not be assured under this alternative.

Alternative 2: Proposed Action
Under Alternative 2, the Proposed Action, NPS would manage the same natural, cultural, and recreational resources and facilities as Alternative 1, pursuant to Reclamation law, NPS law, including new legislation establishing the NRA with 10,040 acres of additional agreed-upon neighboring agency lands, a revised MOA with Reclamation, and other applicable laws and regulations. Reclamation would manage their same facilities and areas of responsibility as Alternative 1, and would have unrestricted access to their lands and land interests, water and water interests, and facilities, pursuant to Reclamation law, the revised MOA, and other applicable laws and regulations. NPS would be authorized to work in partnership with private landowners within a Conservation Opportunity Area of 24,300 acres outside the NRA boundary, to implement a variety of tools, including acquiring interests in land from willing landowners, such as fee simple acquisition and conservation easements, which would promote the long-term conservation of resources. A permanent NPS presence would be assured under this alternative, which is also the environmentally preferred alternative.
