General Information

A. What Should I Consider as I Prepare My Comments for EPA?

1. **Submitting CBI.** Do not submit this information to EPA through <http://www.regulations.gov> or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that

you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. **Tips for Preparing Your Comments.** When submitting comments, remember to:

- Identify the rulemaking by docket number and other identifying information (subject heading, **Federal Register** date and page number).
- Follow directions—The agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- Describe any assumptions and provide any technical information and/or data that you used.
- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- Provide specific examples to illustrate your concerns, and suggest alternatives.
- Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- Make sure to submit your comments by the comment period deadline identified.

SUPPLEMENTARY INFORMATION: Under section 108(a) of the Clean Air Act (CAA), the Administrator identifies and lists certain pollutants which "cause or contribute to air pollution which may reasonably be anticipated to endanger public health or welfare." The EPA then issues air quality criteria for listed pollutants, which are commonly referred to as "criteria pollutants." The air quality criteria are to "accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare which may be expected from the presence of [a] pollutant in the ambient air, in varying quantities." Under section 109 of the CAA, EPA establishes national ambient air quality standards (NAAQS) for each listed pollutant, with the NAAQS based on the air quality criteria. Section 109(d) of the CAA requires periodic review

and, if appropriate, revision of existing air quality criteria. The revised air quality criteria reflect advances in scientific knowledge on the effects of the pollutant on public health or welfare. The EPA is also required to periodically review and revise the NAAQS, if appropriate, based on the revised criteria.

Air quality criteria have been established for the nitrogen oxides (NO_x) and NAAQS have been established for nitrogen dioxide (NO₂), an indicator for gaseous NO_x. Presently, EPA is in the process of reviewing the NAAQS for NO₂. As part of its review of the NAAQS, EPA is preparing an assessment of exposures and health risks associated with ambient NO₂. A draft plan describing the proposed approaches to assessing exposures and risks is described in the draft document, *Nitrogen Dioxide Health Assessment Plan: Scope and Methods for Exposure and Risk Assessment*. This document was released for public review and comment in September, 2007 and was the subject of a consultation with the Clean Air Scientific Advisory Committee (CASAC) on October 24 and 25, 2007. Comments received from that consultation were considered in developing the document titled, *Risk and Exposure Assessment to Support the Review of the NO₂ Primary National Ambient Air Quality Standard: First Draft*, which was released for public review and comment in April 2008. This document was the subject of a CASAC review on May 1 and 2, 2008. Comments received from that review have been considered in developing the document titled, *Risk and Exposure Assessment to Support the Review of the NO₂ Primary National Ambient Air Quality Standard: Second Draft*, which was released (except for chapter 8 and part of appendix B) for public review and comment in August 2008. The EPA solicited advice and recommendations from the CASAC by means of a review of this draft document at a public meeting that was held on September 9-10, 2008 in Research Triangle Park, North Carolina. Chapter 8 of this document, and a revised appendix B, are being released on or about October 3, 2008.

Chapter 8 and the revised appendix B will be available online at: http://www.epa.gov/ttn/naaqs/standards/nox/s_nox_cr_rea.html. Their purposes are to convey the approach taken to characterize NO₂ exposures, to convey the approach taken to characterize health risks associated with those exposures, and to present the results of those analyses. The EPA is soliciting advice and recommendations from the

CASAC by means of a review of chapter 8 and the revised appendix B at a public teleconference that will be held on October 22, 2008. Information on that meeting has been announced separately in the **Federal Register**. In preparing a final risk and exposure assessment report, EPA will consider comments received from the CASAC and the public at the meeting held on September 9–10 and at the teleconference to be held on October 22 as well as written comments received during the public comment periods.

Dated: September 18, 2008.

Acting Director, Office of Air Quality Planning and Standards.
