The duty rates on the imported components range from duty-free to 12.5 percent.

This application requests authority for STIHL to conduct the manufacturing activity under FTZ procedures, which could exempt the company from customs duty payments on the imported components used in export production. Approximately 40 percent of production is exported. On domestic sales, the company could defer duty payment and choose the lower duty rate (duty-free to 4.7 percent) that applies to the finished products for the imported components used in manufacturing. STIHL may also realize savings related to direct delivery and weekly customs entry procedures. The company would also realize savings on the elimination of duties on materials that become scrap/waste during manufacturing. The application indicates that the FTZ-related savings would improve the plant's international competitiveness.

In accordance with the Board's regulations, Christopher Kemp of the FTZ staff is designated examiner to

investigate the application and report to the Board.

Public comment is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address listed below. SUPPLEMENTARY INFORMATION: On August 6, 2008, the Department of Commerce (the Department) published the preliminary results of the administrative review of the antidumping duty order on stainless steel sheet and strip in coils from Mexico for the period July 1, 2006, through June 30, 2007. *See Stainless Steel Sheet and Strip in Coils From Mexico; Preliminary Results of Antidumping Duty Administrative Review*, 73 FR 45708 (August 6, 2008). The current deadline for the final results of this review is December 4, 2008.

Extension of Time Limits for Final Results

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended (the Act), requires the Department to issue the final results of an administrative review within 120 days after the date on which the preliminary results were published. However, if it is not practicable to complete the review within this time period, section 751(a)(3)(A) of the Act allows the Department to extend the time limit for the final results up to 180 days from the date of publication of the preliminary results.

The Department finds that it is not practicable to complete this review within the original time frame because additional analysis that must be performed with respect to respondent ThyssenKrupp Mexinox S.A. de C.V. and Mexinox USA, Inc.'s cost of

production and certain adjustments made to U.S. price. Consequently, and in accordance with section 751(a)(3)(A) of the Act and 19 CFR 351.213(h)(2), the Department is extending the time limit for completion of the final results of this administrative review until no later than February 2, 2009, which is 180 days from the date of publication of the preliminary results. This notice is published in accordance with section 751(a)(3)(A) of the Act.

Dated: October 7, 2008.
