Each sector must be adequately represented, and the intent is to have a group that, as a whole, reflects an appropriate and equitable balance and mix of interests given the responsibilities of the AP. Criteria for membership include one or more of the following: (1) experience in the HMS recreational fishing industry; (2) experience in the HMS commercial fishing industry; (3) experience in fishery-related industries (e.g., marinas, bait and tackle shops); (4) experience in the scientific community working with HMS; and/or (5) representation of a private; non-governmental; regional, national, or international organization representing marine fisheries, environmental, governmental, or academic interests dealing with HMS.

Five additional members on the AP include one member representing each of the following Councils: New England Fishery Management Council, the Mid-Atlantic Fishery Management Council, the South Atlantic Fishery Management Council, the Gulf of Mexico Fishery

Management Council, and the Caribbean Fishery Management Council. The AP also includes 22 ex-officio participants: 20 representatives of the coastal states and two representatives of the interstate commissions (the Atlantic States Marine Fisheries Commission and the Gulf States Marine Fisheries Commission).

NMFS will provide the necessary administrative support, including technical assistance, for the AP. However, NMFS will not compensate participants with monetary support of any kind. Depending on availability of funds, members may be reimbursed for travel costs related to the AP meetings.

C. Meeting Schedule

Meetings of the AP will be held as frequently as necessary but are routinely held twice each year in the spring and fall. The meetings may be held in conjunction with public hearings.

Dated: October 9, 2008.

The development of a South Atlantic Council FEP provides the first regional opportunity to compile and review available habitat, biological, social, and economic fishery and resource information for fisheries in the South Atlantic Bight ecosystem and serves as a source document for the CE-BA.

Actions in the Comprehensive Ecosystem-based Amendment include: Establishment of deepwater Coral Habitat Areas of Particular Concerns (CHAPCs), establishment of a Shrimp Fishery Access Area for deepwater shrimp fisheries within the proposed CHAPCs, designation of Allowable

Golden Crab Fishing Areas within the proposed CHAPCs where golden crab traps can continue to be used, a monitoring requirement for the golden crab fishery using available tools such as Vessel Monitoring System technology or electronic logbooks, and non-regulatory action addressing compliance with the spatial presentation requirements in the Essential Fish Habitat (EFH) Final Rule.

Agenda items for the Coral AP meeting include: discussion and recommendations regarding coral management issues to include in Comprehensive Ecosystem-based Amendment 2, the Deep-Sea Coral Research and Technology Program Draft Strategic Plan being developed by NOAA's National Undersea Research Program (NURP), NOAA's Coral Reef Conservation Program, and coral research priorities for 2009-10.
