Title: Water Quality Standards Regulation (Renewal).

ICR numbers: EPA ICR No. 0988.10, OMB Control No. 2040-0049.

ICR Status: This ICR is scheduled to expire on November 30, 2008. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. Under OMB regulations, the Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Water quality standards are provisions of State, Tribal, and Federal law that consist of designated uses for waters of the United States, water quality criteria to protect the designated uses, and an antidegradation policy. Section 303(c) of the Clean Water Act requires States and authorized Tribes to establish water quality standards, and to review and, if appropriate, revise their water quality standards once every three years. The Act also requires EPA to review and either approve or disapprove the new or revised standards, and to promulgate replacement Federal standards if necessary. Section 118(c)(2) of the Act specifies additional water quality standards requirements for waters of the Great Lakes system.

The Water Quality Standards Regulation (40 CFR part 131 and portions of part 132) governs national implementation of the water quality standards program. The Regulation describes requirements and procedures for States and authorized Tribes to develop, review, and revise their water quality standards, and EPA procedures for reviewing and approving the water quality standards.

The Regulation establishes specific additional requirements for water quality standards and their implementation in the waters of the Great Lakes system, contained in the Water Quality Guidance for the Great Lakes System (40 CFR part 132).

Burden Statement: The public reporting and recordkeeping burden for this collection of information is estimated to average 1,060 hours per response annually. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review

instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: States, Territories and certain authorized Indian tribes that adopt water quality standards under the Clean Water Act; and water dischargers subject to certain requirements related to water quality standards in the Great Lakes system.

Estimated Number of Respondents: 2,809 (56 States and Territories, 43 Tribes; 2,710 Great Lakes dischargers).

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 293,214 hours.

Estimated Total Annual Cost: \$14,866,862 with no annualized capital or O&M cost.

Changes in the Estimates: There is an increase of 32,500 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due to an adjustment in the number of Tribes approved to administer water quality standards programs to reflect additional approvals since the previous ICR in 2005.

Dated: October 15, 2008.

Sara Hisel-McCoy,

Director, Collection Strategies Division.
