

That petition has now been ruled on, and the Commission's rulemaking decision is reflected in the discussion of the scope of the hearing addressed in Section III.D, above.<sup>7</sup>

Finally, the third issue Nevada raises in its September 9 Petition concerns the status of security clearances and access to classified information in the Yucca Mountain construction authorization application. Nevada argues that its representatives have not been informed of decisions on their security clearances and on access to classified information, "notwithstanding timely applications," so no contentions based on classified information can be prepared.<sup>8</sup> To remedy this, Nevada again asks for a bifurcation of contention-filing deadlines.

It is the Commission's understanding that, as of the end of July, one of Nevada's security clearance applications was complete and was being processed, another application was incomplete, and two applications had been withdrawn.<sup>9</sup> From this, the Commission concludes that the timeliness of Nevada's security clearance applications is factually ambiguous. Moreover, it is not immediately clear that the perceived problem could not be remedied by the provision of redacted versions of classified documents that could provide a basis for the formulation of contentions before the security clearance application reviews are completed. The Commission directs the PAPO Board to resolve both of these questions.

*It is so ordered.*

#### SUPPLEMENTARY INFORMATION:

##### I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is hereby issuing a director's decision authorizing the renewal of the certificates of compliance for the two GDPs located near Paducah, KY, and Portsmouth, OH, for the USEC, allowing continued operation of these plants. The renewal of these certificates for the GDPs covers a 5-year period. USEC submitted individual renewal requests for both the Paducah and Portsmouth GDPs on April 10, 2008, pursuant to Title 10 of the Code of Federal Regulations (10 CFR), Section 76.31.

Pursuant to 10 CFR 76.53, the NRC consulted with and requested written comments on the renewal application from the U.S. Environmental Protection Agency (EPA) and the Department of Energy (DOE). EPA responded in a letter dated September 15, 2008, (ML082840196) stating that it had thoroughly reviewed the USEC application to ensure that USEC had provided an accurate environmental compliance overview. The EPA found that both the local and regional EPA regulators had adequately inspected the
