Permit No. 10080, issued on December 18, 2007, (72 FR 72996), and subsequently amended on January 31, 2008, (Permit No. 10080-01 was a minor amendment, which required no **Federal Register** notice) and on April 8, 2008 (73 FR 22931) authorizes the permit holder to examine expanding populations of the Western North Atlantic stocks of harbor seals (*Phoca vitulina concolor*) and gray seals (*Halichoerus grypus*) in the Gulf of Maine. In addition to capture and sampling activities, the permit authorizes harassment of gray seals incidental to boat approaches to seals on haul outs. The current version of the permit, Permit No. 10080-02, is valid through December 31, 2012.

The permit holder is requesting the permit be amended to include authorization to: (1) remotely mark the pelage of adult gray seals of both sexes (200 per year) using the various dyes and paints already permitted for use on pups; (2) use an additional type of marking agent, an alcohol based- dye (Rhodamine B 500%), on pups and adults; (3) disturb an additional 400 non-target gray seals per year during the additional marking activities; and (4) disturb an additional 300 gray seals annually during field camp operations associated with conduct of the research. The permit holder also requests permission for the incidental research-related mortality of up to four gray seal pups annually.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**,

NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: October 22, 2008.
