Submission for OMB Review; Comment Request; California Health Interview Survey Cancer Control Module (CHIS-CCM) 2009 (NCI)

SUMMARY: Under the provisions of Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the National Cancer Institute (NCI), the National Institutes of Health (NIH), has submitted to the Office of Management and Budget (OMB) a request for review and approval of the information collection listed below. This proposed information collection was previously published in the **Federal Register** on August 22, 2008 (Volume 73, No. 164, p. 49685) and allowed 60 days for public comment. No public comments were received. The purpose of this notice is to allow an additional 30 days for public comment. The National Institutes of Health may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

Proposed Collection: Title: California Health Interview Survey Cancer Control Module (CHIS-CCM) 2009. *Type of Information Collection Request:* New. *Need and Use of Information Collection:* The NCI has sponsored four Cancer Control Modules in the California Health Interview Survey (CHIS), and will be sponsoring a fifth to be administered in 2009. CHIS is a telephone survey that collects population-based, standardized health-related data to assess California's progress in meeting Healthy People 2010 objectives for the nation and the state. The CHIS sample is designed to provide statistically reliable estimates statewide, for California counties, and for California's ethnically and racially diverse population. Initiated by the UCLA Center for Health Policy

Research, the California Department of Health Services, and the California Public Health Institute, the survey is funded by a number of public and private sources. It was first administered in 2001 to 55,428 adults and subsequently in 2003 to 42,043 adults, in 2005 to 43,020 adults, and in 2007 to 48,150 adults. These adults are a representative sample of California's non-institutionalized population living in households. CHIS 2009, the fifth bi-annual survey, is planned for

administration to 55,000 adult Californians. This study will allow NCI to examine patterns and trends in cancer screening and follow-up, as well as to study other cancer-related topics such as tobacco control, diet, physical activity, and obesity. Additionally, CHIS is designed to be comparable to the National Health Interview Survey (NHIS) data in order to conduct comparative analyses. CHIS provides enhanced estimates for cancer risk factors and screening among racial/

ethnic minority populations. *Frequency of Response:* Once. *Affected public:* Individuals or households. *Types of Respondents:* U.S. adults and adolescents (persons 12 years of age and older). The total annual burden hours requested are 3,436.93 (see Table A). The annualized cost to respondents is estimated at: \$57,825. There are no Capital Costs, Operating Costs, and/or Maintenance Costs to report.

TABLE A—ANNUALIZED BURDEN ESTIMATES FOR CHIS 2009

Type of respondent	Form type	Number of respondents	Frequency of response	Average time per response (hours)	Annual hour burden
Adults	Adult Pilot	75	1	8/60	10
	Adult Survey	24,000	1	8/60	3,200
	Child Weight-Height Pilot	640	1	15/60	160
Adolescents	Adolescent Pilot	8	1	2/60	.27
	Adolescent Survey	2,000	1	2/60	66.67
Total	26,723	3,436.93
