**IAC Canton, Inc., A Subsidiary of
International Automotive Components
Group, North America, Inc., Canton,
OH; Notice of Affirmative
Determination Regarding Application
for Reconsideration**

By application dated October 29, 2008, United Steelworkers of America AFL-CIO, Local 550-L requested administrative reconsideration of the negative determination regarding workers' eligibility to apply for Trade Adjustment Assistance (TAA) and Alternative Trade Adjustment Assistance (ATAA) applicable to workers and former workers of the subject firm. The determination was issued on September 22, 2008. The Notice of Determination was published in the **Federal Register** on September 8, 2008 (73 FR 58982).

The initial investigation resulted in a negative determination based on the finding that imports of rubber sheets, dash insulators, and all rubber floor mats did not contribute importantly to worker separations at the subject firm and no shift of production to a foreign source occurred.

In the request for reconsideration, the petitioner provided additional information pertaining to a shift in subject plant production of rubber sheets, dash insulators, and all rubber floor mats to Canada.

The Department has carefully reviewed the request for reconsideration and the existing record and has determined that the Department will conduct further investigation to determine if the workers meet the eligibility requirements of the Trade Act of 1974.

Conclusion

After careful review of the application, I conclude that the claim is of sufficient weight to justify reconsideration of the U.S. Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, DC, this 6th day of November 2008.

Elliott S. Kushner,*Certifying Officer, Division of Trade
Adjustment Assistance.*

SUPPLEMENTARY INFORMATION:**I. Background**

The data submitted annually on the ETA-204 report enables the Employment and Training Administration to project revenues for the Unemployment Insurance (UI) program on a state-by-state basis and to measure the variations in assigned contribution rates which result from different experience rating systems. Used in conjunction with other data, the ETA-204 assists in determining the effects of certain factors (e.g., seasonality, stabilization, expansion or contraction in employment, etc.) on the unemployment experience of various

groups of employers. The data also provide an early signal for potential solvency problems and are useful in analyzing factors which give rise to these potential problems and permit an evaluation of the effectiveness of the various approaches available to correct the detected problems. Further, the data are key components to the "Significant Tax Measures Report" which provides the information necessary to evaluate and compare state UI tax systems.
