

approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Inorganic Arsenic Emissions from Glass Manufacturing Plants were proposed on July 20, 1983, and promulgated on August 4, 1986. The standards were amended on both May 31, 1990 and October 17, 2000. These standards apply to each glass melting furnace that uses commercial arsenic as a raw material. These standards do not apply to pot furnaces. Also, rebricking is not considered construction or modification for the purposes of 40 CFR 61.05(a). This information is being collected to assure compliance with 40 CFR part 61, subpart N.

The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 60, subpart A, and any changes, or additions to the General Provisions specified at 40 CFR part 63, subpart HHH.

Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance; and are required, in general, of all sources subject to NESHAP.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 49 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Glass melting furnaces that use commercial arsenic as a raw material. These standards do not apply to pot furnaces.

Estimated Number of Respondents: 16.

Frequency of Response: Initially, occasionally, semi-annually, and yearly.

Estimated Total Annual Hour Burden: 3,098.

Estimated Total Annual Cost: \$306,106, which is comprised of \$250,106 in labor costs, Operations & Maintenance (O&M) costs of \$56,000, and no annualized capital/start-up costs.

Changes in the Estimates: There is no change in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens.

Dated: November 13, 2008.
