SUPPLEMENTARY INFORMATION:

The Animal and Plant Health Inspection Service (APHIS) is announcing a series of meetings to discuss its National Tuberculosis (TB) Program. The meetings are designed to assemble a wide range of producers and other stakeholders to discuss current challenges and potential new approaches for TB control and eradication in view of budgetary constraints. The meetings will be held in various geographical locations to facilitate attendance. Participants will have the opportunity to pose questions and offer written and oral comments. Tentative topics and questions for discussion at the upcoming meetings include:

1. *Regulatory Framework.* What is the role of State statutes in the National TB Program of the future? Are there other approaches to establishing movement restrictions and testing requirements that more effectively reduce the risk(s) of disease transmission from affected herds?

2. *Wildlife Issues.* How should the risk of TB associated with disease transmission in wildlife be mitigated?

3. *Biosecurity Issues.* How could producers be encouraged to adopt management and biosecurity practices that reduce the risk of transmission of TB and how could the National TB Program facilitate producers' adoption of these practices?

4. *Budget Concerns.* What alternatives exist for funding National TB Program activities?

5. *Future of Indemnities.* How should limited indemnity funds be used to reduce the risk of continued disease transmission in affected herds?

6. *Import Issues.* How should the risk of transmission of bovine tuberculosis associated with the importation of live cattle into the United States be mitigated?

7. *Eradication vs. Control.* Is eradication of TB in domestic livestock

feasible or is control a more appropriate program objective given the availability of program funding?

A list of discussion topics, questions, and meeting details is also available via the APHIS Web site at: http://www.aphis.usda.gov/newsroom/hot_issues/bovine_tuberculosis/bovine_tb.shtml.
