[NRC-2008-0404 and NRC-2008-0482]

Consideration of Environmental Impacts of Temporary Storage of Spent Fuel After Cessation of Reactor Operation and Waste Confidence Decision Update: Extension of Comment Period

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule and update and proposed revision of waste confidence decision; Extension of comment period.

SUMMARY: On October 9, 2008, the Nuclear Regulatory Commission (NRC) published for public comment a proposal to amend its generic determination of no significant environmental impact for the temporary storage of spent fuel after cessation of reactor operation codified at 10 CFR 51.23(a) (73 FR 59547) and a related update and proposed revision of its 1990 Waste Confidence Decision (73 FR 59551). The comment period for this proposed rule and for the proposed revisions of its Waste Confidence Decision was to have expired on December 8, 2008. A number of requests for extension of the comment period have been received. The NRC has decided to extend the comment period for an additional 60 days.

DATES: The comment period has been extended and now expires on February 6, 2009. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received before this date.

ADDRESSES: You may submit comments by any one of the following methods. Comments submitted in writing or in electronic form will be made available for public inspection. Because your comments will not be edited to remove any identifying or contact information,

the NRC cautions you against including any information in your submission that you do not want to be publicly disclosed.

Airworthiness Directives; Honeywell International Inc. ALF502L-2 and ALF502L-2C Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for Honeywell International Inc. ALF502L-2 and ALF502L-2C turbofan engines with certain high-pressure compressor (HPC) first stage discs installed. This proposed AD would require performing a dimensional inspection to determine if excessive disc balance material was removed and a magnetic particle inspection if the disc passes the dimensional inspection. This proposed AD results from reports of discs found with excessive material removed from the balancing material of the disc. We are proposing this AD to prevent the discs from fracturing before reaching the currently published life limit. A disc fracture could result in an uncontained failure of the disc and damage to the airplane.

DATES: We must receive any comments on this proposed AD by January 27, 2009.

ADDRESSES: Use one of the following addresses to comment on this proposed AD.
