

ESTIMATES OF ANNUALIZED HOUR BURDEN¹—CSAT GPRA CLIENT OUTCOME MEASURES FOR DISCRETIONARY PROGRAMS—Continued

Center/form/respondent type	Number of respondents	Responses per respondent	Total responses	Hours per response	Total hour burden	Added burden proportion ²	Total annual burden hours
Total	326,586		1,050,236		165,841		66,326

NOTES:

¹ This table represents the maximum additional burden if adult respondents, for the discretionary services programs including ATR, provide three sets of responses/data and if CSAT adolescent respondents provide four sets of responses/data.

² Added burden proportion is an adjustment reflecting customary and usual business practices programs engage in (e.g., they already collect the data items).

³ Screening, Brief Intervention, Treatment and Referral (SBIRT) grant program:

* 150,618 Screening Only (SO) respondents complete section A of the GPRA instrument, all of these items are asked during a customary and usual intake process resulting in zero burden; and

* 27,679 Brief Intervention (BI) respondents complete sections A & B of the GPRA instrument, all of these items are asked during a customary and usual intake process resulting in zero burden; and

* 9,200 Brief Treatment (BT) & Referral to Treatment (RT) respondents complete all sections of the GPRA instrument.

⁴ Data Extract by Grants: Grant burden for capturing customary and usual data.

⁵ Upload: All 24 ATR grants upload data.

⁶ Upload: 5 of the 7 SBIRT grants upload data; the other 2 grants conduct direct data entry.

The estimates in this table reflect the maximum annual burden for currently funded discretionary services programs. The number of clients/participants served in following years is estimated to be the same assuming level funding of the discretionary programs, resulting in the same annual burden estimate for those years.
