SUPPLEMENTARY INFORMATION:

Title of Collection: Survey of Earned Doctorates.

OMB Approval Number: 3145-0019.

Expiration Date of Approval: May 31, 2009.

Type of Request: Intent to seek approval to extend an information collection for three years.

1. *Abstract:* The National Science Foundation Act of 1950, as subsequently amended, includes a statutory charge to “* * * provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources, and to provide a source of information for policy formulation by other agencies of the Federal Government.” The Survey of Earned Doctorates is part of an integrated survey system that meets the human resources part of this mission.

The Survey of Earned Doctorates has been conducted continuously since 1958 and is jointly sponsored by six Federal agencies in order to avoid duplication. It is an accurate, timely source of information on our Nation's most precious resource—highly educated individuals. Data are obtained via paper questionnaire or Web survey from each person earning a research doctorate at the time they receive the degree. Data are collected on their field of specialty, educational background, sources of support in graduate school, debt level, postgraduation plans for employment, and demographic characteristics.

The Federal government, universities, researchers, and others use the information extensively. The National Science Foundation, as the lead agency, publishes statistics from the survey in several reports, but primarily in the annual publication series, “Science and Engineering Doctorates” and the Interagency Report, “Doctorate Recipients from U.S. Universities: Summary Report.” These reports are available in print and electronically on the World Wide Web.

The survey will be collected in conformance with the Privacy Act of 1974. Responses from individuals are voluntary. NSF will ensure that all individually identifiable information collected will be kept strictly confidential and will be used for research or statistical purposes, analyzing data, and preparing scientific reports and articles.

2. *Expected Respondents:* A total response rate of 91.6% of the total 48,079 persons who earned a research doctorate was obtained in academic year 2006/2007. This level of response rate has been consistent for several years. The respondents will be individuals and the estimated number of respondents annually is around 45,000 (based on 2007 data).

3. *Estimate of Burden:* The Foundation estimates that, on average, 20 minutes per respondent will be required to complete the survey. The total annual respondent burden for the Survey of Earned Doctorates is therefore estimated at 15,000 hours, based on 45,000 respondents. This is higher than the last annual estimate approved by OMB due to the increased number of respondents (doctorate recipients).

Dated: December 4, 2008.

Reports Clearance Officer, National Science Foundation.
