

information or when disclosure is necessary to preserve confidence in the integrity of DHS or is necessary to demonstrate the accountability of DHS's officers, employees, or individuals covered by the system, except to the extent it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

**DISCLOSURE TO CONSUMER REPORTING AGENCIES:**

None.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Records in this system are stored electronically or on paper in secure facilities in a locked drawer behind a locked door. The records are stored on magnetic disc, tape, digital media, and CD-ROM.

**RETRIEVABILITY:**

Records may be retrieved by name, alphanumeric code (an identifier assigned to an individual by the vendor who performs the analysis of the radiation monitor), date(s) of exposure, and social security number.

**SAFEGUARDS:**

These records are protected by employing a multi-layer security approach to prevent unauthorized access to sensitive data through appropriate administrative, physical, and technical safeguards. Protective strategies such as implementing physical access controls at DHS facilities; ensuring confidentiality of communications using tools such as encryption, authentication of sending parties, and compartmentalizing databases; and employing auditing software and personnel screening to ensure that all personnel with access to data are screened through background investigations commensurate with the level of access required to perform their duties. All S&T electronic records are secured in full compliance with the requirements of DHS IT Security Program Handbook. This handbook establishes a comprehensive information security program.

**RETENTION AND DISPOSAL:**

S&T has submitted a proposed records retention and disposal schedule to NARA to maintain the records for seventy-five years. Health problems caused by radiation (such as cancer) can take years to manifest and can reoccur multiple times during an individual's life. Therefore, S&T will retain the

records for 75 years so that, if an individual has problems they believe are attributable to radiation exposure received as a government employee, the government will have those records available and will be able to provide an accurate accounting of an individual's exposure. Until NARA approves a records retention and disposal schedule, S&T will retain the records indefinitely. Upon receiving the approved schedule, S&T will dispose of records according to NARA's instructions.

**SYSTEM MANAGER AND ADDRESS:**

S&T Safety, Health, Environmental, & Energy Programs Manager, Mail Stop: 2100, Department of Homeland Security, 245 Murray Lane, SW., Washington, DC 20528.
