

(CASAC), an independent science advisory committee established pursuant to section 109 of the Clean Air Act and part of the EPA's Science Advisory Board (SAB), provides independent scientific advice on NAAQS matters, including advice on EPA's draft ISAs.

EPA formally initiated its current review of the criteria for oxides of nitrogen and sulfur in December 2005 (70 FR 73236) and May 2006 (71 FR 28023) respectively, requesting the submission of recent scientific information on specified topics. In the initial stages of the criteria reviews, EPA recognized the merit of integrating the science assessment for these two pollutants due to their combined effects on atmospheric chemistry, deposition processes, and environment-related public welfare effects. In July 2007 (72 FR 34004), EPA held a workshop to discuss, with invited scientific experts, initial draft materials prepared in the development of the ISA and supplementary annexes for oxides of nitrogen and sulfur. EPA's "Draft Plan for Review of the Secondary National Ambient Air Quality Standards for Nitrogen Dioxide and Sulfur Dioxide" was made available in September 2007 for public comment and was discussed by the Clean Air Scientific Advisory Committee (CASAC) via a publicly accessible teleconference consultation on October 30, 2007 (72 FR 57568). EPA made its Draft Plan available on EPA's Web site: http://www.epa.gov/ttn/naaqs/standards/no2so2sec/cr_pd.html. The draft "Integrated Science Assessment for Oxides of Nitrogen and Sulfur—Environmental Criteria; First External Review Draft" was released for review on December 21, 2007 (72 FR 72719). The CASAC reviewed the first draft document at a public peer review meeting on April 2–3, 2008. EPA addressed comments from the CASAC and the public in the second external review draft document, "Integrated Science Assessment for Oxides of Nitrogen and Sulfur—Environmental Criteria; Second External Review Draft," which was released for public comment on August 12, 2008 (72 FR 46908). The second draft was reviewed by the CASAC at a public meeting on October 2–3, 2008. EPA has considered comments by CASAC and by the public in preparing this final ISA.

SUPPLEMENTARY INFORMATION: Notice is hereby given that a petition has been received from the State of Maine requesting a determination by the Regional Administrator, U. S. Environmental Protection Agency, pursuant to section 312(f)(3) of Public Law 92–500 as amended by Public Law 95–217 and Public Law 100–4, that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for the Kennebunk, Kennebunkport, Wells area.

The proposed no discharge area for the KENNEBUNK/KENNEBUNKPORT/WELLS:

Waterbody/general area	Latitude	Longitude

The proposed NDA includes the municipal waters of Kennebunkport, Kennebunk, and Wells.

There are marinas, yacht clubs and public landings/piers in the proposed area with a combination of mooring fields and dock space for the recreational and commercial vessels. Maine has certified that there are five pumpout facilities within the proposed area available to the boating public. The majority of facilities are connected to the sewage system. A list of the facilities, phone numbers, locations, and

hours of operation is provided at the end of this petition.

Maine has provided documentation indicating that the total vessel population is estimated to be 537 in the proposed area. It is estimated that 195 of the total vessel population may have a Marine Sanitation Device (MSD) of some type.

The proposed area is identified as a High Value Wildlife Habitat by the U.S. fish and Wildlife Service and contains the Wells National Estuarine Research Reserve and the Rachel Carson National Wildlife Refuge. The intertidal zone

includes a diverse array of habitats from rocky shores to large amounts of wetland and salt marshes and mud flats. There are over 19,700 acres of salt marshes. The area includes 672 acres of essential habitat for the federally endangered Piping Plover and Least Tern. There are 11 beaches, three marinas, three boat launches, and four campgrounds in the proposed area. This area is a popular destination for boaters due to its natural environmental diversity and would benefit from a No Discharge Area.
